GUARDIAN HOLDINGS LIMITED AND ITS SUBSIDIARIES

STATEMENT OF MANAGEMENT'S RESPONSIBILITIES

Management is responsible for the following:

- Preparing and fairly presenting the accompanying consolidated financial statements of Guardian Holdings Limited (the Company) and its subsidiaries (the Group) and which comprise the consolidated statement of financial position as at 31 December 2025, the consolidated statements of income, comprehensive income, changes in equity and cash flows for the year then ended, and a summary of material accounting policies and other explanatory information;
- Ensuring that the Group keeps proper accounting records;
- Selecting appropriate accounting policies and applying them in a consistent manner;
- Implementing, monitoring and evaluating the system of internal control that assures security of the Group's assets, detection/prevention of fraud;
- Ensuring that the system of internal control operated effectively during the reporting period;
- Producing reliable financial reporting that complies with laws and regulations, including the Companies Act and Insurance Act; and
- Using reasonable and prudent judgement in the determination of estimates.

In preparing these audited consolidated financial statements, management utilised the IFRS Accounting Standards, as issued by the International Accounting Standards Board and adopted by the Institute of Chartered Accountants of Trinidad and Tobago. Where IFRS Accounting Standards presented alternative accounting treatments, management chose those considered most appropriate in the circumstances.

Nothing has come to the attention of management to indicate that the Group will not remain a going concern for the next twelve months from the reporting date.

Management affirms that it has carried out its responsibilities as outlined above.

Ian Chinapoo

Group Chief Executive Officer

Keesha Sahadeo

Group Chief Financial Officer

26 February 2026

Independent auditor's report

To the Shareholders of Guardian Holdings Limited

Report on the audit of the consolidated financial statements

Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Guardian Holdings Limited (the Company) and its subsidiaries (together 'the Group') as at 31 December 2025, and their consolidated financial performance and their consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards.

What we have audited

The Group's consolidated financial statements comprise:

- the consolidated statement of financial position as at 31 December 2025;
- the consolidated statement of income for the year then ended;
- the consolidated statement of comprehensive income for the year then ended;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, comprising material accounting policy information and other explanatory information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

PricewaterhouseCoopers, PO Box 550, 11-13 Victoria Avenue, Port of Spain, 100902, Trinidad and Tobago
T: +1 (868) 299 0700

Independence

We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) as applicable to audits of financial statements of public interest entities. We have also fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Our audit approach

Overview

Overall materiality: TT\$103,000,000 which represents approximately 1% of total Net Asset Value plus Contractual Service Margin.

In establishing the overall approach to the group audit, we determined the type of work that needed to be performed by us, as the group auditor, or component auditors from other PwC network firms or other networks operating under our instruction.

- Valuation of insurance contract liabilities measured under the general measurement model (GMM) and variable fee approach (VFA) methods - Estimation of fulfilment cash flows.
- Integrity of input data within IT systems requiring complex calculations to determine insurance revenue and insurance service expenses measured under the GMM and VFA approach.

Audit scope

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where management made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including, among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

How we tailored our group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls, and the industry in which the Group operates.

Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall group materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the consolidated financial statements as a whole.

Overall group materiality	TT\$103,000,000
How we determined it	Approximately 1% of total Net Asset Value plus Contractual Service Margin
Rationale for the materiality benchmark applied	We chose total Net Asset Value plus Contractual Service Margin as the benchmark because, in our view, it is an appropriate benchmark against which the performance of the Group will be measured by users. We chose 1% which is within a range of acceptable benchmark thresholds.

We agreed with the Audit Committee that we would report to them misstatements identified during our audit above TT\$4,000,000, as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Valuation of insurance contract liabilities measured under the general measurement model (GMM) and variable fee approach (VFA) methods - Estimation of fulfilment cash flows

Refer to notes 2.15, 3(a), 4.1 and 15 to the consolidated financial statements for disclosures of related accounting policies and balances.

As at 31 December 2025, insurance contract liabilities measured under the general measurement model (GMM) and variable fee approach (VFA) methods totalled TT\$21.3 billion or 63.9% of the Group's total liabilities. Insurance contract liabilities measured under the variable fee approach and general measurement model consist of:

- Contractual service margin (CSM), which is a component of the carrying amount of the asset or liability for a group of insurance contracts representing the unearned profit the Group will recognise as it provides insurance contract services under the insurance contracts in the group.
- Fulfilment cash flows (FCFs) are the current estimates of the future cash flows within the contract boundary of a group of contracts that the Group expects to collect from premiums and pay out for claims, benefits and expenses, adjusted to reflect the timing and the uncertainty of those amounts. FCFs comprise unbiased and probability-weighted estimates of future cash flows, discounted to present value to reflect the time value of money and financial risks, plus a risk adjustment for non-financial risk (risk adjustment).

Measurement of the FCFs requires management judgments in estimating the probability-weighted expected value of present value of the future cash flows, in addition to applying a risk adjustment for non-financial risk.

Our approach to addressing the matter, with the assistance of our actuarial experts, included the following procedures amongst others:

- Evaluated the accounting policies for any material changes.
- Updated our understanding of management's end-to-end process and controls supporting the determination of FCFs.
- Tested the accuracy and completeness of a sample of the data used in the estimates of FCFs.
- Assessed the reasonableness of management's best-estimate assumptions for mortality and policyholder behaviour (lapse and surrenders), economic assumptions for discount rates, and the adjustment for non-financial risk used in the measurement of insurance contract liabilities by:
 - Evaluating the Group's internal experience studies for appropriateness by considering published industry studies, market data, entity specific facts and circumstances and our knowledge of the products.
 - Evaluating whether management's assumptions were determined in accordance with the requirements of IFRS 17.

Key audit matter

How our audit addressed the key audit matter

Estimates of expected cash flows incorporate best estimate assumptions for mortality, morbidity, longevity, expenses, and policyholder behaviour, as well as assumptions for discount rates and the risk adjustment. The assumptions are reviewed and updated at least annually by the Group's Appointed Actuaries.

We considered this a key audit matter due to the judgement applied by management when determining the FCFs and the corresponding high degree of auditor judgment and effort required in evaluating the assumptions described above.

- Evaluated a sample of actuarial models used in management's determination of the FCFs by:
 - Assessing the appropriateness of the modelling of product features.
 - Assessing the appropriateness of the application of best-estimate assumptions.
- Assessed the disclosures within the consolidated financial statements against the requirements of IFRS 17.

Integrity of input data within IT systems requiring complex calculations to determine insurance revenue and insurance service expenses measured under the GMM and VFA approach

Refer to notes 2.15 and 15 to the consolidated financial statements for disclosures of related accounting policies and balances.

As at 31 December 2025, insurance contract revenue and insurance service expenses measured under the GMM and VFA methods totalled TT\$1.8 billion and TT\$1 billion respectively.

Insurance revenue comprises the amounts relating to the changes in liability for remaining coverage (LRC) and insurance acquisition cash flows recovery.

Insurance service expenses include amongst others, incurred claims and benefits, other directly attributable insurance service expenses, amortisation of insurance acquisition cash flows and changes that relate to past and future service.

Our approach to addressing the matter, with the assistance of our actuarial experts, included the following procedures amongst others:

- Evaluated the accounting policies for any material changes.
- Tested the operating effectiveness of select IT general controls as it pertains to the systems used in calculating insurance revenue and service expenses.
- Inspected management's reconciliation of select data and traced to the underlying source systems to test the completeness and accuracy of data transfer.

Insurance revenue:

- Tested, on a sample basis, the insurance revenue in the period by tracing and agreeing to underlying source documents and the applicable policy administration systems.
- Recalculated the unearned profit recognised in profit or loss for the services provided in the period.
- Tested a sample of insurance acquisition cash flows recovery by tracing to underlying insurance contracts and recalculating the allocation over the contract boundary period.

Key audit matter	How our audit addressed the key audit matter
<p>The amounts pertaining to these classes of transactions are calculated and accounted for via various complex IT applications and systems which are responsible for the processing, transformation and output of data.</p> <p>We considered this a key audit matter due to the magnitude of the classes of transactions and the complexity of calculations associated with the transformation of the underlying data.</p>	<p>Insurance service expenses:</p> <ul style="list-style-type: none"> - Tested a sample of incurred claims, benefits and other incurred expenses by tracing to supporting documentation and the applicable policy administration systems including subsequent payments. - Recalculated the amortisation of insurance acquisition cash flows for the period. • Traced on a sample basis, source data pertaining to insurance revenue and insurance service expenses through the Group's various information technology (IT) applications and systems and tested that configurations used were in accordance with the Group's methodology. • Tested the underlying IT system logic used to calculate insurance revenue and expenses by using a benchmarking approach.

Other information

Management is responsible for the other information. The other information comprises the supplemental information showing the USD translation of the primary statements appended to the consolidated financial statements (but does not include the consolidated financial statements and our auditor's report thereon), which we obtained prior to the date of this auditor's report, and the Annual Report , which is expected to be made available to us after that date.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, on the other information that we obtained prior to the date of this auditor's report we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

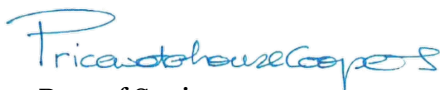

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Dwayne Rodriguez-Seijas.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

1. Incorporation and principal activities of the Group

Guardian Holdings Limited (the 'Company' and 'GHL') is a public limited liability holding company, which was incorporated in Trinidad and Tobago on 8 November 1982. The address of its registered office is 1 Guardian Drive, Westmoorings S.E., Trinidad and Tobago. Guardian Holdings Limited and its subsidiaries (the 'Group') constitute a diversified financial services group engaged in underwriting all classes of long-term and short-term insurance business, insurance brokerage operations, the provision of pension and asset management services and property development.

The Company is 61.77% (2024: 61.77%) owned by NCB Global Holdings Limited ('NCBGH' and the 'Parent'), a limited liability holding company, which was incorporated in Trinidad and Tobago in December 2017. NCBGH is 100% owned by NCB Financial Group Limited ('NCBFG'). NCBFG was incorporated in Jamaica in April 2016 and is the financial holding company for the NCB Group. NCBFG is 46.24% (2024: 47.14%) owned by AIC (Barbados) Limited and the ultimate parent company is Portland Holdings Inc., incorporated in Canada. Portland Holdings Inc. is controlled by Hon. Michael A. Lee-Chin, O.J., a director of the Company. The NCB Financial Group provides a diversified range of financial services through its subsidiaries and associates.

The ordinary shares of GHL and NCBFG are listed on the Trinidad and Tobago Stock Exchange and the Jamaica Stock Exchange.

2. Material accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied in all the years presented, unless otherwise stated.

2.1 Basis of preparation

These consolidated financial statements are prepared in accordance with IFRS Accounting Standards which comprise the following authoritative literature: IFRS Accounting Standards, IAS Standards, and Interpretations developed by the IFRS Interpretations Committee (IFRIC interpretations) or its predecessor body, the Standing Interpretations Committee (SIC Interpretations).

The consolidated financial statements have been prepared on a historical cost basis, except for the following balances which are stated at fair or actuarial value in compliance with the relevant IFRS: freehold properties, investment properties, financial assets at fair value through profit or loss or other comprehensive income, derivative financial instruments, defined benefit pension plan assets and obligations, insurance and reinsurance contracts.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. Areas involving a higher degree of judgement or complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 3.

(a) New standards and amendments/revisions to published standards and interpretations effective in 2025

The following amendments to published standards took effect for the Group's accounting periods beginning on or after 1 January 2025:

IAS 21 - The effects of changes in foreign exchange rates - Amendments - Lack of exchangeability

These amendments specify when a currency is exchangeable into another currency and when it is not, how exchange rates should be determined when a currency is not exchangeable, and the disclosures that are required for currencies that are not exchangeable. These amendments had no impact on the Group's consolidated financial statements.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.1 Basis of preparation (continued)

(b) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Group.

The following is a list of new IFRS reporting standards, interpretations and amendments issued that are not yet effective as at 31 December 2025 and have not been early adopted by the Group. The Group expects to implement these standards when they become effective.

Effective 1 January 2026:

IFRS 9, Financial instruments and IFRS 7, Financial instruments: Disclosures - Amendments - Amendments to the classification and measurement of financial instruments.

These amendments provide guidance on the derecognition of a financial liability settled through electronic transfer and the classification of financial assets where contractual terms are consistent with a basic lending arrangement. They also enhance the description of the term "non-recourse" where assets have non-recourse features and clarify the characteristics of contractually linked instruments that distinguish them from other transactions. Finally, these amendments require additional disclosures for investments in equity instruments designated at fair value through other comprehensive income and for financial assets that have contractual terms that could change the timing or amount of contractual cash flows. The Group does not expect these amendments to have a material impact on the consolidated financial statements.

IFRS 9, Financial instruments and IFRS 7, Financial instruments: Disclosures - Amendments - Contracts Referencing Nature - dependent Electricity.

These amendments change the 'own use' and hedge accounting requirements of IFRS 9 and include targeted disclosure requirements to IFRS 7. The amendments apply only to contracts that expose an entity to variability in the underlying amount of electricity because the source of its generation depends on uncontrollable natural conditions (such as the weather). These are described as 'contracts referencing nature-dependent electricity'. These amendments do not impact the Group's consolidated financial statements.

Annual Improvements to IFRS Accounting Standards - Volume 11

The Annual Improvements (Volume 11) include amendments to the following Standards:

- IFRS 1 First-time Adoption of International Financial Reporting Standards;
- IFRS 7 Financial Instruments: Disclosures, and its accompanying Guidance on implementing IFRS 7;
- IFRS 9 Financial Instruments;
- IFRS 10 Consolidated Financial Statements; and
- IAS 7 Statement of Cash Flows.

These are minor updates to reduce potential confusion that may be caused by obsolete references or inconsistencies in the wording of various IFRS accounting standards. No impact is expected on the Group's consolidated financial statements.

Effective 1 January 2027:

IFRS 18 - Presentation and disclosure in financial statements - New standard

IFRS 18 replaces IAS 1, 'Presentation of financial statements'. The new concepts introduced in IFRS 18 include the structure of the statement of profit or loss, disclosures for profit or loss performance measures that are reported outside of the financial statements, and enhanced principles on aggregation and disaggregation for both the primary statements and the notes to the financial statements. This new standard is expected to impact the Group's consolidated financial statements and the extent and nature of this impact is being assessed.

IFRS 19 - Subsidiaries without Public Accountability: Disclosures - New standard

This is a new, optional standard that can only be applied to subsidiaries that do not have public accountability and whose ultimate or immediate parent produces publicly available, consolidated financial statement that are compliant with IFRS Accounting Standards. Subsidiaries applying IFRS 19 will be subject to a reduced disclosure requirement burden. The Group is conducting an assessment to determine the extent to which the implementation of IFRS 19 is applicable and appropriate for its subsidiaries.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.2 Consolidation

(a) Subsidiaries

Subsidiaries are all entities over which the Group has control. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- ▶ Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- ▶ Exposure, or rights, to variable returns from its involvement with the investee; and
- ▶ The ability to use its power over the investee to affect its returns.

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- ▶ The contractual arrangement with the other vote holders of the investee
- ▶ Rights arising from other contractual arrangements
- ▶ The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

All intra-group transactions and balances are eliminated on consolidation. Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Group.

A listing of the Group's principal subsidiaries is set out in Note 42.

(b) Associated companies

The Group's investment in associated companies is accounted for using the equity method of accounting. An associate is an entity in which the Group has significant influence and which is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

Under the equity method, the investment in associates is carried in the consolidated statement of financial position at cost plus post-acquisition changes in the Group's share of net assets of the associates. Goodwill relating to associates is included in the carrying amount of the investment and is not amortised. The consolidated statement of income reflects the share of the results of operations of the associates. When there has been a change recognised directly in the equity of the associates, the Group recognises its share of any changes and discloses this, when applicable, in the statement of changes in equity.

The financial statements of the associates are prepared for the same reporting period as the Company. Where necessary, adjustments are made to bring their accounting policies in line with the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an additional impairment loss on the Group's investment in associates. The Group determines at each consolidated statement of financial position date whether there is any objective evidence that the investment in associates is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associates and its carrying value and recognises the amount in the consolidated statement of income.

A listing of the Group's associated companies is set out in Note 42.

(c) Mutual funds

The Group manages a series of mutual funds through its trust and asset management subsidiaries, Guardian Group Trust Limited and Guardian Asset Management and Investment Services Limited. These funds invest mainly in equity securities, debt securities and cash and cash equivalents.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.2 Consolidation (continued)

(c) Mutual funds (continued)

As at the consolidated statement of financial position date, the Group has determined that it controls, as defined in Note 2.2(a), specific funds. Similar to the Group's consolidation of its subsidiaries, the assets and liabilities of these funds have been consolidated in the financial statements on a line-by-line basis. The carrying value of the total investments and cash held by the funds are recorded as investment securities and cash and cash equivalents respectively on the consolidated statement of financial position. Interests held by external parties in the funds that are consolidated are recorded as third party interest in mutual funds on the consolidated statement of financial position.

2.3 Segment reporting

A business segment is a group of assets and operations engaged in providing products and services that are subject to risks and returns that are different from those of other business segments. For management purposes, the Group is organised into business units based on their products and services and has four main reportable operating segments:

- (i) Life, health and pension;
- (ii) Property and casualty;
- (iii) Insurance brokerage; and
- (iv) Asset management.

All other activities of the Group that do not fall into the segments above are aggregated and reported under 'Other including consolidation adjustments'. These activities include the following: the Group's property development in Martinique, the Group's investment in RGM Limited, the Group's shared services subsidiary and the activities of the Company.

2.4 Foreign currency translation

(a) Translation of transactions in foreign currencies

The financial results of Group companies are prepared in the currency in which they conduct their ordinary course of business, which is referred to as functional currency.

Transactions occurring in currencies other than the functional currency are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of income.

(b) Translation to the presentation currency

In preparing the consolidated financial statements, the results and financial position of all the Group entities are translated from their respective functional currencies to Trinidad and Tobago dollars, the presentation currency, as follows:

- (i) Assets and liabilities for each consolidated statement of financial position presented are translated at the closing rate at the end of the reporting period;
- (ii) Income and expenses for each consolidated statement of income are translated at average exchange rates; and
- (iii) All resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign entities are taken to the consolidated statement of comprehensive income. When a foreign operation is sold, liquidated or wound up, such exchange differences are recognised in the consolidated statement of income as part of the gain or loss on sale.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.5 Property, plant and equipment

Freehold properties comprise mainly offices occupied by the Group and are shown at fair value, based on periodic, but at least triennial, valuations by external independent appraisers, less subsequent depreciation for buildings. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset. All other property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the consolidated statement of income during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of land and buildings are recognised in the consolidated statement of comprehensive income. Decreases that offset previous increases of the same asset are charged to the consolidated statement of comprehensive income. All other decreases are charged to the consolidated statement of income.

Land is not depreciated. Depreciation is charged over the estimated useful lives of the assets using the following rates and methods:

Freehold building	-	straight-line method, 2% per annum
Leasehold property	-	over the period of the lease
Air-conditioning equipment	-	straight-line method, 10 - 20% per annum
Motor vehicles	-	straight-line method, 20% per annum
Other plant, machinery, office furniture & equipment	-	straight-line method, 10 - 40% per annum

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.10).

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in the consolidated statement of income. When revalued assets are sold, the amounts included in the revaluation surplus account are transferred to retained earnings.

2.6 Investment properties

Freehold or leasehold properties held for long-term rental yields that are not occupied by the Group are classified as investment properties. Investment properties comprise freehold land and buildings, and subsequent to initial recognition, are stated at fair value. Fair value is based on active market prices, adjusted as necessary, for any difference in the nature, location or condition of the specified asset, as determined annually by external independent appraisers. Any appreciation or diminution in value is recognised in the consolidated statement of income.

If investment properties become owner-occupied, they are reclassified as property, plant and equipment, and their fair value at the date of reclassification becomes its cost for subsequent accounting periods. Alternatively, where properties classified as held for use become investment properties because of a change in use, these properties are accounted for as investment properties and any differences arising between the carrying amount and the fair value of these items at the date of transfer are recognised in the consolidated statement of comprehensive income. However, if a fair value gain reverses a previous impairment loss, the gain is recognised in the consolidated statement of income.

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. Upon disposal, any surplus previously recorded in the property revaluation reserve in equity is transferred to retained earnings.

Properties under construction that are intended for sale, are classified as properties for development and sale. These balances are carried at the lower of cost and net realisable values (Note 2.8).

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.7 Intangible assets

(a) Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired subsidiary/associate at the acquisition date. Goodwill on acquisition of subsidiaries is reported in the consolidated statement of financial position. Goodwill on acquisition of associates is included in investments in associates. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

(b) Customer-related intangibles

Customer-related intangibles comprise renewal rights and relationships when a business is acquired. They are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date.

Subsequent to initial recognition, customer-related intangibles are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is calculated using the straight line method to allocate the intangibles over their useful lives. The remaining useful lives of customer-related intangibles range from 3 to 50 years.

(c) Brands

Brands acquired through direct purchase are carried at cost less accumulated amortisation. Amortisation is calculated using the straight-line method to allocate the cost of brands over their estimated useful lives. The remaining useful life of brands is 3 years.

(d) Computer software and website development costs

Acquired computer software licenses and website development costs are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. Costs that are directly associated with the development of identifiable and unique software products controlled by the Group, and which will probably generate economic benefits exceeding costs beyond one year, are also recognised as intangible assets. These costs are amortised using the straight line method over their estimated useful lives. The remaining useful lives of computer software and website development costs range from 0.7 to 10 years.

Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred.

2.8 Properties for development and sale

Properties for sale or under construction that are intended for sale, are classified as properties for development and sale. These balances are carried at the lower of cost and net realisable values. These properties include offices, retail shops and residential units.

An external valuation specialist was engaged in determining the net realisable value for the office and retail shops, and a discounted cash flow model was used as there is a lack of comparable data because of the nature of the properties. For the residential units, data from binding sales transactions are used to assess the net realisable value.

Impairment losses on properties for development and sale are recognised in the consolidated statement of income when the net realisable value is lower than cost. Subsequently, where cost is lower than the net realisable value, a reversal of any prior impairment losses is recognised in the consolidated statement of income.

Reclassification to investment properties is made when the Group enters into an operating lease with a third party. Transfers are done at fair value.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.9 Financial assets

(a) Initial recognition and measurement

At initial recognition, the Group measures financial assets at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of financial assets. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the consolidated statement of income.

The Group's financial assets include cash and short-term deposits, investment in debt and equity securities, interest receivable, and other loans and receivables.

(b) Classification and subsequent measurement

Debt instruments

Subsequent to initial recognition, the Group's debt instruments are measured in accordance with the business models determined by the Group's respective business units for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Group classified its debt instruments:

- (i) Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. The carrying amounts of these assets are adjusted by any expected credit loss allowance recognised. In addition to certain debt securities, the Group's loans and receivables are carried at amortised cost.
- (ii) Fair value through other comprehensive income: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income. Movements in the carrying amount are taken through other comprehensive income except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit or loss.
- (iii) Fair value through profit or loss: Assets that do not meet the criteria for amortised cost or fair value through other comprehensive income are measured at fair value through profit or loss. A gain or loss on a debt instrument that is subsequently measured at fair value through profit or loss is recognised in the consolidated statement of income in the period in which it arises. The Group may, on initial recognition, irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or fair value through other comprehensive income as fair value through profit or loss, if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise. Financial assets held for trading, or are managed and whose performance is evaluated on a fair value basis, are measured at fair value through profit or loss.

The Group reclassifies debt instruments when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be infrequent.

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.9 Financial assets (continued)

(b) Classification and subsequent measurement (continued)

Debt instruments (continued)

Business model assessment

The Group's business units determine their business models at the level that best reflects how it manages groups of financial assets to achieve its business objective. Factors considered by the business units in determining the business model for a group of assets include:

- ▶ the stated policies and objectives for the group of assets and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets with the duration of any related liabilities or expected cash outflows or realising cash flows through sale of the assets;
- ▶ how performance of the group of assets is evaluated and reported to management;
- ▶ the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- ▶ how managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected);
- ▶ the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

If cash flows after initial recognition are realised in a way that is different from original expectations, the business units do not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets.

The solely payment of principal and interest (SPPI) test

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount). 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and other basic lending risks and costs, as well as a profit margin.

Where the business model is to hold assets and collect contractual cash flows or to collect contractual cash flows and sell, the Group's business units assesses whether the financial assets' cash flows represent solely payments of principal and interest. In making this assessment, the business units considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. the definition of interest. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Equity instruments

Subsequent to initial recognition, the Group measures all equity investments at fair value, and changes in the fair value of equity instruments are recognised in the consolidated statement of income.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.9 Financial assets (continued)

(c) Derecognition of financial assets

A financial asset (or when applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- ▶ The rights to receive cash flows from the asset have expired.
- ▶ The Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement.
- ▶ The Group has transferred its rights to receive cash flows from the asset and either:
 - ▶ has transferred substantially all the risks and rewards of the asset, or
 - ▶ has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received is recognised in the consolidated statement of income. In addition, on derecognition of an investment in a debt instrument classified as at fair value through other comprehensive income, the cumulative gain or loss previously accumulated in the fair value reserve is reclassified to the consolidated statement of income.

2.10 Impairment of assets

(a) Financial assets

At each reporting date, the Group assesses, on a forward-looking basis, the expected credit losses (ECL) associated with its financial assets measured at amortised cost and fair value through other comprehensive income (excluding equity instruments).

The Group measures loss allowances on its debt instruments at an amount equal to lifetime ECL, except in the following cases, for which the amount recognised is 12-month ECL:

- ▶ Debt securities that are determined to have low credit risk at the reporting date; and
- ▶ Other financial instruments for which credit risk has not increased significantly since initial recognition.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial asset, whereas 12-month ECL are the portion of ECL that results from default events that are possible within the 12 months after the reporting date.

For receivables, the Group applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Loss allowances for ECL are presented in the consolidated financial statements as follows:

- ▶ Financial assets measured at amortised cost: the loss allowance is deducted from the gross carrying amount of the assets in the statement of financial position. Movement in ECL is recognised in the consolidated statement of income.
- ▶ Debt instruments measured at fair value through other comprehensive income: the loss allowance is recognised in the consolidated statement of income with the corresponding entry recognised in other comprehensive income.

Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring as at the reporting date with the risk of default occurring as at the date of initial recognition. In making this assessment, the Group considers information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Group's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Group's core operations.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.10 Impairment of assets (continued)

(a) Financial assets (continued)

Significant increase in credit risk (continued)

The assessment to identify whether credit risk has increased significantly since initial recognition takes into account the following:

- ▶ Actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- ▶ Actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the debtor's ability to meet its obligations;
- ▶ Actual or expected significant changes in the operating results of the debtor;
- ▶ Significant increases in credit risk on other financial instruments of the debtor;
- ▶ Significant changes in the expected performance and behaviour of the debtor, including changes in the payment status of debtor;
- ▶ Actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant change in the debtor's ability to meet its debt obligation.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrated otherwise.

The Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if the financial instrument has a low risk of default, the debtor has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the debtor to fulfill its contractual cash flow obligations. The Group considers a debt instrument to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

Credit-impaired financial assets

At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt instruments carried at fair value through comprehensive income are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- ▶ Significant financial difficulty of the debtor or issuer;
- ▶ A breach of contract, such as a default or past due event;
- ▶ The disappearance of an active market for a financial asset because of financial difficulties;
- ▶ It is becoming probable that the debtor will enter bankruptcy or other financial reorganisation; or
- ▶ Rating agencies' assessments of creditworthiness.

Definition of default

The Group considers a financial asset to be in default when:

- ▶ the debtor is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or
- ▶ the debtor is past due more than 90 days unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

In assessing whether a debtor is in default, the Group considers indicators that are qualitative, quantitative and based on data developed internally and obtained from external sources.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.10 Impairment of assets (continued)

(a) Financial assets (continued)

Write-off

The Group writes off financial assets, either partially or in full, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include ceasing enforcement activity and where the Group's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount.

Measurement of expected credit losses

The measurement of expected credit losses is a function of:

- (i) Probability of default (PD);
- (ii) Loss given default (LGD); and
- (iii) Exposure at default (EAD).

The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Forward-looking information considered by the Group includes economic data and forecasts published by governmental bodies and monetary authorities, supranational organisations such as the Organization for Economic Cooperation and Development and the International Monetary Fund, and selected private-sector and academic forecasters.

Expected credit losses are measured as the present value of all cash shortfalls i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the original effective interest rate.

The mechanics of the expected credit losses method are summarised below:

- ▶ A financial instrument that is not credit-impaired on initial recognition, a 12-month ECL allowance is calculated. The Group calculates the 12-month ECL allowance based on the expectation of a default occurring in the twelve months following the reporting date. The expected 12-month default probability is applied to a forecast exposure at default and multiplied by the expected loss given default, and discounted by the original effective interest rate.
- ▶ When a financial instrument has shown a significant increase in credit risk since initial recognition, the Group records an allowance for life-time ECL. The mechanics are similar to 12-month ECL calculation on a financial instrument that is not credit-impaired on initial recognition, but default probability and loss given default are estimated over the life of the instrument.
- ▶ A financial instrument that is credit-impaired, but is not a purchased or originated credit-impaired financial instrument, the Group records an allowance for lifetime ECL calculated similar to lifetime ECL on a financial instrument that has shown a significant increase in credit risk since initial recognition.
- ▶ Purchased or credit-impaired financial assets are assets that are credit-impaired on initial recognition. ECL on these assets are always measured on a lifetime basis, discounted by a credit adjusted effective interest rate.

Where lifetime ECL is measured on a collective basis to cater for cases where evidence of significant increases in credit risk at the individual instrument level may not yet be available, the financial instruments are grouped on the basis of shared risk characteristics that include: instrument type; credit risk ratings; nature, size and industry of debtors; collateral type; and geographic location of the debtor.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.10 Impairment of assets (continued)

(b) Non-financial assets

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

The Group bases its impairment calculations on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of three years. For longer periods, a long-term growth rate is applied to project future cash flows after the third year.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. Goodwill and intangible assets are tested for impairment annually as at 31 December and when circumstances indicate that the carrying value may be impaired.

2.11 Fair value measurement

The Group measures certain financial instruments and non-financial assets at fair value at each statement of financial position date.

When one is available, the Group measures the fair value of an instrument using the quoted price in an active market. If there is no quoted price in an active market, the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same and discounted cash flow analysis making maximum use of market inputs and relying as little as possible on entity-specific inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- ▶ Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- ▶ Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- ▶ Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. This level consists mainly of various freehold and investment properties, various unquoted equity securities, and the unquoted, illiquid Series G Government of Barbados debt securities.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

External valuers are involved for valuation of certain assets such as investment properties, freehold and leasehold properties and properties for development and sale. Involvement of external valuers is decided annually and selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

2.12 Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liabilities simultaneously.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.13 Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, money market placements and other short-term highly liquid investments with original maturities of three months or less, which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts, when they arise, are shown within borrowings in current financial liabilities on the consolidated statement of financial position.

2.14 Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds.

2.15 Insurance and investment contracts

(a) Summary of measurement approaches

The Group uses different measurement approaches, depending on the type of contracts, as follows:

Contracts issued	Product Classification	Measurement model
<u>Traditional Life and Interest Sensitive without Guarantees</u>		
Traditional life and critical illness contracts - participating; non-participating; interest sensitive non-participating	Insurance contracts	General Measurement Model
Individual Life Personal Accident	Insurance contracts	General Measurement Model
Group Life Term (5-year contract duration)	Insurance contracts	General Measurement Model
<u>Annuities</u>		
Group annuity contracts - defined benefits; defined contribution; savings benefits	Insurance contracts	General Measurement Model
Traditional annuity contracts - deferred benefit; immediate benefit; lifestyle; non-participating	Insurance contracts	General Measurement Model
Individual annuity lifestyle	Insurance contracts with direct participation features	Variable Fee Approach
<u>Unit linked life and interest sensitive with guarantees</u>		
Unit and Equity Linked contracts - annuity; critical illness; life	Insurance contracts with direct participation features	Variable Fee Approach
Unit and Equity Linked contracts - life & critical illness Evolution series	Insurance contracts with direct participation features	Variable Fee Approach
<u>Short term Group life and Health contracts</u>		
Group life; individual and group health	Insurance contracts	Premium Allocation Approach
<u>Property and Casualty</u>		
Property; motor; casualty such as employers' liability and public liability; marine; accident; engineering; bonding and crime	Insurance contracts	Premium Allocation Approach

(b) Definition and classification

Insurance contracts are contracts under which the Group accepts significant insurance risk from a policyholder by agreeing to compensate the policyholder if a specified uncertain future event adversely affects the policyholder. In making this assessment, all substantive rights and obligations, including those arising from law or regulation, are considered on a contract-by-contract basis. The Group uses judgement to assess whether a contract transfers insurance risk (i.e. if there is a scenario with commercial substance in which the Group has the possibility of a loss on a present value basis) and whether the accepted insurance risk is significant. The Group defines as significant insurance risk the possibility of having to pay benefits on the occurrence of an insured event that are at least 10% more, on a present value basis, than the benefits payable if the insured event did not occur.

Contracts that have a legal form of insurance but do not transfer significant insurance risk and expose the Group to financial risk are classified as investment contracts and follow financial instruments accounting under IFRS 9. Some investment contracts without discretionary participation features issued by the Group fall under this category. Refer to Note 22. The Group does not have any investment contracts with discretionary participation features, whereby the investor has the right and is expected to receive, as a supplement to the amount not subject to the Group's discretion, potentially significant additional benefits based on the return of specified pools of investment assets.

The Group issues certain insurance contracts that are substantially investment-related service contracts where the return on the underlying items is shared with policyholders. Underlying items comprise specified portfolios of investment assets that determine amounts payable to policyholders.

An insurance contract with direct participation features is defined by the Group as one which, at inception, meets the following criteria:

- ▶ The contractual terms specify that the policyholders participate in a share of a clearly identified pool of underlying items;
- ▶ The Group expects to pay to the policyholder an amount equal to a substantial share of the fair value returns on the underlying items; and
- ▶ The Group expects a substantial proportion of any change in the amounts to be paid to the policyholder to vary with the change in fair value of the underlying items.

Investment components in most Traditional Life, Critical Illness, and Annuity products comprise cash surrender values less policy loans and applicable surrender fees. These are not considered significant.

The Group uses judgement to assess whether the amounts expected to be paid to the policyholders constitute a substantial share of the fair value on the underlying returns.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(b) Definition and classification (continued)

Insurance contracts with direct participation features are viewed as creating an obligation to pay policyholders an amount that is equal to the fair value of the underlying items, less a variable fee for service. The variable fee comprises the Group's share of the fair value of the underlying items, which is based on a fixed percentage of investment management fees (withdrawn annually from policyholder account values based on the fair value of underlying assets and specified in the contracts with policyholders) less the FCF that do not vary based on the returns on underlying items. The measurement approach for insurance contracts with direct participation features is referred to as the VFA. The VFA modifies the accounting model in IFRS 17 (referred to as the GMM) to reflect that the consideration an entity receives for the contracts is a variable fee.

Direct participating contracts issued by the Group are contracts with direct participation features where the Group holds the pool of underlying assets and accounts for these groups of contracts under the VFA. All other insurance contracts originated by the Group are without direct participation features.

In the normal course of business, the Group uses reinsurance to mitigate its risk exposures. A reinsurance contract transfers significant risk if it transfers substantially all the insurance risk resulting from the insured portion of the underlying insurance contracts, even if it does not expose the reinsurer to the possibility of significant loss.

All references to insurance contracts in these consolidated financial statements apply to insurance contracts issued or acquired, reinsurance contracts held or issued and insurance contracts with or without direct participation features, unless specifically stated otherwise.

(c) Aggregation bases for disclosure purposes

Insurance contracts are classified into five main categories.

(i) Property and casualty insurance contracts

These contracts are principally property, motor, casualty (employers' liability, public liability), and marine contracts.

Property insurance contracts indemnify the Group's customers in the event of a loss from a specified insured peril such as fire, windstorm or earthquake up to the insured amount and within the terms of the policy conditions. These contracts are issued for both private and commercial risks.

Motor insurance contracts indemnify the Group's customers for their legal requirement under the respective country's road traffic legislation, which in certain instances stipulate unlimited coverage for third party liability. These contracts may be extended for additional coverage such as physical damage, theft and personal accident.

Casualty insurance contracts provide coverage for liability exposures that indemnify the Group's customers against actions from third parties, which are subject to the policy limits and conditions. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and employers who become liable to pay compensation to third parties for bodily harm or property damage (public liability).

Marine insurance contracts indemnify the Group's customers for loss or damage to their insured cargo, commercial hull and pleasure craft vessels. Third party coverage is also provided.

Claims and loss adjustment expenses are charged to income as incurred based on the estimated liability for compensation owed to contract holders. They arise from events that have occurred up to the consolidated statement of financial position date, even if they have not yet been reported to the Group. Liabilities for unpaid claims are estimated using techniques such as the input of assessments for individual cases reported to the Group and statistical analyses for the claims incurred but not reported ('IBNR'), and to estimate the expected ultimate cost of more complex claims that may be affected by external factors such as court decisions. Estimates are continually revised as more information becomes available and for the effects of anticipated inflation. Adjustments arising on these revisions are recognised within claims expense in the current year.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(c) Aggregation bases for disclosure purposes (continued)

(ii) Short-term group life and health insurance contracts

These contracts are principally group life, group health, and individual health insurance policies.

Group life contracts protect the Group's customers from the consequences of events (such as death or critical illness) that would affect the ability of the customer or his/her dependants to maintain their current level of income. Health insurance contracts provide for both unexpected and preventative medical treatment and drugs. On these contracts, the benefits paid on occurrence of the specified insurance event are either fixed or linked to the extent of the economic loss suffered by the policyholder. There are no maturity or surrender benefits.

Claims and loss adjustment expenses arise, are estimated, and charged similarly to that of the property and casualty insurance contracts.

(iii) Traditional life and interest sensitive without guarantees

These contracts insure events associated with human mortality over a long duration. A liability for policyholders' benefits that are expected to be incurred in the future is established on acceptance of the insurance risk, and is based on key assumptions made with respect to variables such as mortality, persistency, investment returns and expense inflation.

Actuarial liabilities are calculated using best estimates of future cash flows arising from the insurance contracts in force, with a risk adjustment. As experience unfolds, the risk adjustment will be included in future income to the extent they are no longer required to cover adverse experience.

In addition to death benefits, some of these contracts contain a discretionary participation feature that entitles the holders to a bonus or dividend declared from time to time. The discretionary element of the benefits payable under these policies, as well as the guaranteed elements are treated as liabilities. The actuarial calculations make allowance for future expected policyholder bonuses and dividends.

(iv) Unit linked life and interest sensitive with guarantees

The premiums paid for these contracts contain an element that covers the insured event and another which is used to accumulate cash values available for withdrawal at the option of the policyholder. These cash values earn interest.

The liabilities arising from the unit-linked contracts comprise the liability for the insured risk and the accumulated cash value. The liability for the insured risk is determined in a manner identical to the liability for traditional life and interest sensitive contracts without guarantees and is included in the policyholders' liability balance, while the liability for the accumulated cash value is carried at fair value of the assets which fund the liabilities.

The Jamaican life insurance subsidiary issues interest-sensitive policies. The liability for the interest-sensitive policies is determined as the sum of the liability for the insured risk (as determined above for unit-linked policies) and the liability for the accumulated cash values. The entire liability for the interest-sensitive policies is recorded in insurance contracts. For the Trinidad and Tobago life insurance subsidiary, the insurance contracts prescribe no fixed terms.

(v) Annuities

These contracts insure events associated with human longevity over a long duration. A liability for policyholders' benefits that are expected to be incurred in the future is established on acceptance of the insurance risk, and is based on key assumptions similar to those made for traditional life products, except that morbidity is also a key variable. Some of the annuities include unit-linked elements containing guarantees that entitle the holders to a minimum guaranteed crediting rate over the life of the policy and provide for minimum annuity purchase rates. These guarantees are allowed for in the liability calculations.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(d) Unit of account

The Group manages insurance contracts issued by product lines and certain sub-categories, where each sub-category includes contracts that are subject to similar risks. All insurance contracts within a specified sub-category represent a portfolio of contracts. Each portfolio is further disaggregated into groups of contract.

A single cohort was applied to all contracts issued 31 December 2021 and prior. These contracts were measured using the Fair Value Approach.

Quarterly cohorts were applied to all GMM and VFA contracts issued 1 January 2022 and after, and all PAA portfolios are disaggregated into annual cohorts regardless of their issue date. The Full Retrospective Approach was applied to all of these contracts. All portfolios are further disaggregated as follows:

All portfolios are further disaggregated as follows:

- (i) Contracts that are onerous at initial recognition;
- (ii) Contracts that at initial recognition have no significant possibility of becoming onerous subsequently; or
- (iii) A group of remaining contracts.

These groups represent the level of aggregation at which insurance contracts are initially recognised and measured. Such groups are not subsequently reconsidered.

For each portfolio of contracts, the Group determines the appropriate level at which reasonable and supportable information is available to assess whether these contracts are onerous at initial recognition and whether non-onerous contracts have a significant possibility of becoming onerous. This level of granularity determines sets of contracts. The Group uses significant judgement to conclude that all contracts within a set are sufficiently homogeneous and will be allocated to the same group without performing an individual contract assessment.

For all long-term and short-term products, sets of contracts usually correspond to policyholder pricing groups that the Group determined to have similar insurance risk and that are priced within the same insurance rate ranges. The Group monitors the profitability of contracts and the likelihood of changes in insurance, financial and other exposures resulting in these contracts becoming onerous at a portfolio level with no information available at a more granular level.

Some individual and group health products, unit-linked annuity products, defined benefit annuity products, and Lifestyle individual annuity products have break-even profitability or are loss making, and therefore were allocated to groups of contracts that were onerous or remaining at initial recognition. All other contracts issued are always priced with high expected profitability margins, and thus, such contracts are allocated to groups of contracts that have no significant possibility of becoming onerous at initial recognition.

For the property and casualty contracts measured using the PAA, the Group assumes that no such contracts are onerous at initial recognition, unless facts and circumstances indicate otherwise. If facts and circumstances indicate that some contracts are onerous, an additional assessment is performed to distinguish onerous contracts from non-onerous ones. For non-onerous contracts, the Group assesses the likelihood of changes in the applicable facts and circumstances in the subsequent periods in determining whether contracts have a significant possibility of becoming onerous. This assessment is performed at a portfolio level.

Portfolios of reinsurance contracts held are assessed for aggregation separately from portfolios of insurance contracts issued. Applying the grouping requirements to reinsurance contracts held, the Group aggregates reinsurance contracts into quarterly and annual cohorts in line with how this was defined for insurance contracts. These portfolios then were further disaggregated as follows:

- (i) Contracts for which there is a net gain at initial recognition, if any;
- (ii) Contracts for which at initial recognition there is no significant possibility of a net gain arising subsequently; and
- (iii) Remaining contracts in the portfolio, if any.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(d) Unit of account (continued)

Reinsurance contracts held are assessed for aggregation requirements on an individual contract basis. The Group tracks internal management information reflecting historical experiences of such contracts' performance, by treaty and sub-divided by line of business. This information is used as a basis for price negotiations with reinsurers as well as setting retention amounts. The Group's assessment of the performance of the treaties have concluded that some reinsurance contracts held are in a net cost position without a significant possibility of a net gain arising subsequently while other reinsurance contracts have a net gain at initial recognition.

Before the Group accounts for an insurance contract based on the guidance in IFRS 17, it analyses whether the contract contains components that should be separated. IFRS 17 distinguishes three categories of components that have to be accounted for separately:

- ▶ Cash flows relating to embedded derivatives that are required to be separated;
- ▶ Cash flows relating to distinct investment components; and
- ▶ Promises to transfer distinct goods or distinct non-insurance services.

The Group does not have any products with components that require separation. The Group therefore applies IFRS 17 to all components of the contract. In assessing whether the contract should be further separated, the following considerations are made:

- (i) Whether there is interdependency between the different risks covered;
- (ii) Whether components lapse together; and
- (iii) Whether components can be priced and sold separately.

The Group does not have any contracts that require further separation of insurance contracts.

(e) Recognition and derecognition

Groups of insurance contracts issued are initially recognised from the earliest of the following:

- ▶ The beginning of the coverage period;
- ▶ The date when the first payment from the policyholder is due or actually received, if there is no due date; and
- ▶ When the Group determines that a group of contracts become onerous.

Insurance contracts acquired in a business combination or a portfolio transfer are accounted for as if they were entered into at the date of acquisition on transfer.

A group of reinsurance contracts held that covers the losses of separate insurance contracts on a proportionate basis (proportionate or quota share reinsurance) is recognised from the earlier of:

- ▶ The beginning of the coverage period of the group; and
- ▶ The date the Group recognised an onerous group of underlying insurance contracts, if the Group entered into the related reinsurance contract held in the group at or before that date.

The Group does not recognise a group of quota share reinsurance contracts held until it has recognised at least one insurance contract in a group of the underlying insurance contracts, if that date is later than the beginning of the coverage period of the group of reinsurance contracts held. A gap between the start of the coverage period for a quota share contract and that of the underlying contracts rarely occurs in practice.

A group of reinsurance contracts held that covers aggregate losses from underlying contracts in excess of a specified amount (non-proportionate reinsurance contracts, such as excess of loss reinsurance) is recognised at the beginning of the coverage period of that group.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(e) Recognition and derecognition (continued)

Only contracts that meet the recognition criteria by the end of the reporting period are included in the groups. When contracts meet the recognition criteria in the groups after the reporting date, they are added to the groups in the reporting period in which they meet the recognition criteria, subject to the annual cohorts' restriction. Composition of the groups is not reassessed in subsequent periods.

Accounting for contract modification and derecognition

An insurance contract is derecognised when it is:

- ▶ Extinguished (i.e. when the obligation specified in the insurance contract expires or is discharged or cancelled); or
- ▶ The contract is modified and certain additional criteria are met.

When an insurance contract is modified by the Group as a result of an agreement with the counterparties or due to a change in the regulations, the Group treats changes in cash flows caused by the modification as changes in estimates of the FCF, unless the conditions for the derecognition of the original contract are met. The Group derecognises the original contract and recognises the modified contract as a new contract if any of the following conditions are present:

- (a) If the modified terms had been included at contract inception and the Group would have concluded that the modified contract:
 - (i) Is not in scope of IFRS 17;
 - (ii) Results in different separable components;
 - (iii) Results in a different contract boundary; or
 - (iv) Belongs to a different group of contracts.
- (b) The original contract represents an insurance contract with direct participation features, but the modified contract no longer meets that definition, or vice versa; or
- (c) The original contract was accounted for under the PAA, but the modification means that the contract no longer meets the eligibility criteria for that approach.

When an insurance contract not accounted for under the PAA is derecognised from within a group of insurance contracts, the Group:

- (a) Adjusts the FCF to eliminate the present value of future cash flows and risk adjustment for non-financial risk relating to the rights and obligations removed from the group.
- (b) Adjusts the CSM (unless the decrease in the FCF is allocated to the loss component of the LRC of the group) in the following manner, depending on the reason for the derecognition:
 - (i) If the contract is extinguished, in the same amount as the adjustment to the FCF relating to future service.
 - (ii) If the contract is transferred to a third party, in the amount of the FCF adjustment in (a) less than the premium charged by the third party.
 - (iii) If the original contract is modified resulting in its derecognition, in the amount of the FCF adjustment in (a) adjusted for the premium the Group would have charged had it entered into a contract with equivalent terms as the new contract at the date of the contract modification, less any additional premium charged for the modification. When recognising the new contract in this case, the Group assumes such a hypothetical premium as actually received.
- (c) Adjusts the number of coverage units for the expected remaining coverage to reflect the number of coverage units removed.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(e) Recognition and derecognition (continued)

Accounting for contract modification and derecognition (continued)

When an insurance contract accounted for under the PAA is derecognised, adjustments to remove related rights and obligations to account for the effect of the derecognition result in the following amounts being charged immediately to profit or loss:

- (a) If the contract is extinguished, any net difference between the derecognised part of the LRC of the original contract and any other cash flows arising from extinguishment;
- (b) If the contract is transferred to the third party, any net difference between the derecognised part of the LRC of the original contract and the premium charged by the third party; or
- (c) If the original contract is modified resulting in its derecognition, any net difference between the derecognised part of the LRC and the hypothetical premium that the entity would have charged if it had entered into a contract with equivalent terms as the new contract at the date of the contract modification, less any additional premium charged for the modification.

(f) Measurement

Fulfilment cash flows

Fulfilment cash flows within contract boundary

The FCF are the current estimates of the future cash flows within the contract boundary of a group of contracts that the Group expects to collect from premiums and pay out for claims, benefits and expenses, adjusted to reflect the timing and the uncertainty of those amounts.

The estimates of future cash flows:

- (a) Are based on a probability weighted mean of the full range of possible outcomes;
- (b) Are determined from the perspective of the Group, provided the estimates are consistent with observable market prices for market variables; and
- (c) Reflect conditions existing at the measurement date.

An explicit risk adjustment for non-financial risk is estimated separately from the other estimates. For contracts measured under the PAA, unless the contracts are onerous, the explicit risk adjustment for non-financial risk is only estimated for the measurement of the LIC.

The estimates of future cash flows are adjusted using the current discount rates to reflect the time value of money and the financial risks related to those cash flows, to the extent not included in the estimates of cash flows. The discount rates reflect the characteristics of the cash flows arising from the groups of insurance contracts, including timing, currency and liquidity of cash flows. The determination of the discount rate that reflects the characteristics of the cash flows and liquidity characteristics of the insurance contracts requires significant judgement and estimation. Refer to Note 3(a).

Risk of the Group's non-performance is not included in the measurement of groups of insurance contracts issued. In the measurement of reinsurance contracts held, the probability weighted estimates of the present value of future cash flows include the potential credit losses and other disputes of the reinsurer to reflect the non-performance risk of the reinsurer.

The Group estimates certain FCF at a policy level, which is then aggregated into the relevant profitability groups, cohorts, and portfolios.

The Group uses consistent assumptions to measure the estimates of the present value of future cash flows for the group of reinsurance contracts held and such estimates for the groups of underlying insurance contracts.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Fulfilment cash flows (continued)

Contract boundary

The Group uses the concept of contract boundary to determine what cash flows should be considered in the measurement of groups of insurance contracts. This assessment is reviewed every reporting period.

Cash flows are within the boundary of an insurance contract if they arise from the rights and obligations that exist during the period in which the policyholder is obligated to pay premiums or the Group has a substantive obligation to provide the policyholder with insurance contract services. A substantive obligation ends when:

- (a) The Group has the practical ability to reprice the risks of the particular policyholder or change the level of benefits so that the price fully reflects those risks; or
- (b) Both of the following criteria are satisfied:
 - (i) The Group has the practical ability to reprice the contract or a portfolio of contracts so that the price fully reflects the reassessed risk of that portfolio; and
 - (ii) The pricing of the premiums up to the date when the risks are reassessed does not take into account the risks that relate to periods after the reassessment date.

In assessing the practical ability to reprice, risks transferred from the policyholder to the Group, such as insurance risk and financial risk, are considered; other risks, such as lapse or surrender and expense risk, are not included.

Riders, representing add-on provisions to a basic insurance policy that provide additional benefits to the policyholder at additional cost, that are issued together with the main insurance contracts form part of a single insurance contract with all the cash flows within its boundary.

Some insurance contracts issued by the Group provide policyholders with an option to buy an annuity upon the initially issued policies' maturity. The Group assesses its practical ability to reprice such insurance contracts in their entirety to determine if annuity-related cash flows are within or outside of the insurance contract boundary. As a result of this assessment, non-guaranteed annuity options are not measured by the Group until they are exercised.

Cash flows outside the insurance contracts boundary relate to future insurance contracts and are recognised when those contracts meet the recognition criteria.

For groups of reinsurance contracts held, cash flows are within the contract boundary if they arise from substantive rights and obligations of the Group that exist during the reporting period in which the Group is compelled to pay amounts to the reinsurer or in which the Group has a substantive right to receive services from the reinsurer.

The Group's individual life reinsurance agreements held have an unlimited duration but are cancellable for new underlying business with a 60-day notice period by either party. Thus, the Group treats such reinsurance contracts as a series of contracts that cover underlying business in force at the end of the reporting period. Estimates of future cash flows arising from all underlying contracts in force at the reporting period are included in the measurement of the reinsurance contracts.

The Group's group life reinsurance contracts and some of its property and casualty reinsurance contracts held provide coverage for claims incurring during the period of the reinsurance treaty coverage. Thus, all cash flows arising from claims incurred and expected to be incurred in the accident year are included in the measurement of the reinsurance contracts held. The premium status of reinsurance policies are aligned with that of the underlying insurance policy. As a result, if the underlying policy is terminated, reinsurance premiums cease; if the underlying policy is reinstated, reissued, converted or otherwise continued after being previously terminated, reinsurance premiums will recommence, with specific rules applied.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Fulfilment cash flows (continued)

Contract boundary (continued)

The Group's health reinsurance contracts and some of its property and casualty reinsurance contracts held provide coverage for claims incurring during the period of the reinsurance treaty coverage, and up to one year after (i.e., risk attaching reinsurance contracts). Thus, all cash flows arising from claims incurred and expected to be incurred in the two year period are included in the measurement of the reinsurance contracts held.

Cash flows that are not directly attributable to a portfolio of insurance contracts, such as some product development and training costs, are recognised in other operating expenses as incurred.

Insurance acquisition costs

The Group defines acquisition cash flows as cash flows that arise from costs of selling, underwriting and starting a group of insurance contracts (issued or expected to be issued) and that are directly attributable to the portfolio of insurance contracts to which the group belongs. Insurance acquisition cash flows are allocated to groups of insurance contracts on a systematic and rational basis. Insurance acquisition cash flows that are directly attributable to a group of insurance contracts are allocated:

- (a) To that group; and
- (b) To groups that will include insurance contracts that are expected to arise from renewals of the insurance contracts in that group.

Insurance acquisition cash flows not directly attributable to a group of contracts but directly attributable to a portfolio of contracts are allocated to groups of contracts in the portfolio or expected to be in the portfolio.

The Group does not pay (or recognise a liability, applying a standard other than IFRS 17) directly attributable acquisition costs to originate a group of insurance contracts before they are recognised. The Group therefore does not recognise insurance acquisition cash flows assets.

Risk adjustment for non-financial risk

The risk adjustment for non-financial risk is applied to the present value of the estimated future cash flows and reflects the compensation the Group requires for bearing the uncertainty about the amount and timing of the cash flows from non-financial risk as the Group fulfils insurance contracts.

For reinsurance contracts held, the risk adjustment for non-financial risk represents the amount of risk being transferred by the Group to the reinsurer.

Methods and assumptions used to determine the risk adjustment for non-financial risk are discussed in Note 3(a).

Initial measurement - Groups of contracts measured under the GMM and/or the VFA

Contractual service margin

The CSM is a component of the carrying amount of the asset or liability for a group of insurance contracts issued representing the unearned profit that the Company will recognise as it provides insurance contract services in the future.

At initial recognition, the CSM is an amount that results in no income or expenses (unless a group of contracts is onerous) arising from:

- (a) The initial recognition of the FCF;
- (b) Cash flows arising from the contracts in the group at that date;
- (c) The derecognition of any insurance acquisition cash flows asset; and
- (d) The derecognition of any other pre-recognition cash flows. Insurance revenue and insurance service expenses are recognised immediately for any such assets derecognised.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Initial measurement - Groups of contracts measured under the GMM and/or the VFA (continued)

Contractual service margin (continued)

When the above calculation results in a net outflow, the group of insurance contracts issued is onerous. A loss from onerous insurance contracts is recognised in profit or loss immediately, with no CSM recognised on the balance sheet on initial recognition, and a loss component is established in the amount of loss recognised (refer to the Onerous contracts – Loss component section below).

For groups of reinsurance contracts held, any net gain or loss at initial recognition is recognised as the CSM unless the net cost of purchasing reinsurance relates to past events, in which case the Group recognises the net cost immediately in profit or loss. For reinsurance contracts held, the CSM represents a deferred gain or loss that the Group will recognise as a reinsurance expense as it receives insurance contract services from the reinsurer in the future and is calculated as the sum of:

- (a) The initial recognition of the FCF; and
- (b) Cash flows arising from the contracts in the group at that date;
- (c) The amount derecognised at the date of initial recognition of any asset or liability previously recognised for cash flows related to the group of reinsurance contracts held (other pre-recognition cash flows); and
- (d) Any income recognised in profit or loss when the entity recognises a loss on initial recognition of an onerous group of underlying insurance contracts or on addition of onerous underlying insurance contracts to that group.

A loss-recovery component is established or adjusted within the remaining coverage for reinsurance contracts held for the amount of income recognised in (d) above. This amount is calculated by multiplying the loss recognised on underlying insurance contracts by the percentage of claims on underlying insurance contracts that the Group expects to recover from the reinsurance contracts held that are entered into before or at the same time as the loss is recognised on the underlying insurance contracts.

When underlying insurance contracts are included in the same group with insurance contracts issued that are not reinsured, the Group applies a systematic and rational method of allocation to determine the portion of losses that relates to underlying insurance contracts.

For insurance contracts acquired in a portfolio transfer or a business combination within the scope of IFRS 3, at initial recognition, the CSM is an amount that results in no income or expenses arising from:

- (a) The initial recognition of the FCF; and
- (b) Cash flows arising from the contracts in the group at that date, including the fair value of the groups of contracts acquired as at the acquisition date as a proxy of the premiums received.

Subsequent measurement - Groups of contracts measured under the GMM and/or the VFA

The carrying amount at the end of each reporting period of a group of insurance contracts issued is the sum of:

- (a) The LRC, comprising:
 - (i) The FCF related to future service allocated to the group at that date; and
 - (ii) The CSM of the group at that date; and
- (b) The LIC, comprising the FCF related to past service allocated to the group at the reporting date.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Subsequent measurement - Groups of contracts measured under the GMM and/or the VFA (continued)

The carrying amount at the end of each reporting period of a group of reinsurance contracts held is the sum of:

- (a) The remaining coverage, comprising:
 - (i) The FCF related to future service allocated to the group at that date; and
 - (ii) The CSM of the group at that date; and
- (b) The incurred claims, comprising the FCF related to past service allocated to the group at the reporting date.

Changes in fulfilment cash flows

The FCF are updated by the Group for current assumptions at the end of every reporting period, using the current estimates of the amount, timing and uncertainty of future cash flows and of discount rates.

The way in which the changes in estimates of the FCF are treated depends on which estimate is being updated:

- (a) Changes that relate to current or past service are recognised in profit or loss; and
- (b) Changes that relate to future service are recognised by adjusting the CSM or the loss component within the LRC as per the policy below.

For insurance contracts under the GMM, the following adjustments relate to future service and thus adjust the CSM:

- (a) Experience adjustments arising from premiums received in the period that relate to future service and related cash flows such as insurance acquisition cash flows and premium-based taxes;
- (b) Changes in estimates of the present value of future cash flows in the LRC, except those described in the following paragraph;
- (c) Differences between any investment component expected to become payable in the period and the actual investment component that becomes payable in the period, determined by comparing (i) the actual investment component that becomes payable in a period with (ii) the payment in the period that was expected at the start of the period plus any insurance finance income or expenses related to that expected payment before it becomes payable; and
- (d) Changes in the risk adjustment for non-financial risk that relate to future service.

Adjustments (a), (b), and (d) are measured using the locked-in discount rates as described in the section 'Interest accretion on the CSM' below.

For insurance contracts under the GMM, the following adjustments do not relate to future service and thus do not adjust the CSM:

- (a) Changes in the FCF for the effect of the time value of money and the effect of financial risk and changes thereof.
- (b) Changes in the FCF relating to the LIC;
- (c) Experience adjustments – arising from premiums received in the period that do not relate to future service and related cash flows, such as insurance acquisition cash flows and premium-based taxes; and
- (d) Experience adjustments relating to insurance service expenses (excluding insurance acquisition cash flows).

When no commitment is specified, the effect of all changes in assumptions that relate to financial risk and changes thereof on the FCF is recognised in insurance finance income or expenses.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Subsequent measurement - Groups of contracts measured under the GMM and/or the VFA (continued)

Changes in fulfilment cash flows (continued)

For insurance contracts under the VFA, the following adjustments relate to future service and thus adjust the CSM:

- (a) Changes in the Group's share of the fair value of the underlying items; and
- (b) Changes in the FCF that do not vary based on the returns of underlying items:
 - (i) Changes in the effect of the time value of money and financial risks including the effect of financial guarantees;
 - (ii) Experience adjustments arising from premiums received in the period that relate to future service and related cash flows such
 - (iii) Changes in estimates of the present value of future cash flows in the LRC, except those described in the following paragraph;
 - (iv) Differences between any investment component expected to become payable in the period and the actual investment component that becomes payable in the period, determined by comparing (i) the actual investment component that becomes payable in a period with (ii) the payment in the period that was expected at the start of the period plus any insurance finance income or expenses related to that expected payment before it becomes payable; and
 - (v) Changes in the risk adjustment for non-financial risk that relate to future service.

Adjustments (ii) to (v) are measured using the current discount rates.

For insurance contracts under the VFA, the following adjustments do not relate to future service and thus do not adjust the CSM:

- (a) Changes in the obligation to pay the policyholder the amount equal to the fair value of the underlying items;
- (b) Changes in the FCF that do not vary based on the returns of underlying items;
 - (i) Changes in the FCF relating to the LIC; and
 - (ii) Experience adjustments relating to insurance service expenses (excluding insurance acquisition cash flows).

The Group does not have any products with complex guarantees and does not use derivatives to economically hedge the risks.

Changes to the contractual service margin

For insurance contracts issued, at the end of each reporting period, the carrying amount of the CSM is adjusted by the Group to reflect the effect of the following changes:

- (a) The effect of any new contracts added to the group.
- (b) For contracts measured under the GMM, interest accrued on the carrying amount of the CSM.
- (c) Changes in the FCF relating to future service are recognised by adjusting the CSM. Changes in the FCF are recognised in the CSM to the extent the CSM is available. When an increase in the FCF exceeds the carrying amount of the CSM, the CSM is reduced to zero, the excess is recognised in insurance service expenses and a loss component is recognised within the LRC. When the CSM is zero, changes in the FCF adjust the loss component within the LRC with correspondence to insurance service expenses. The excess of any decrease in the FCF over the loss component reduces the loss component to zero and reinstates the CSM.
- (d) The effect of any currency exchange differences.
- (e) The amount recognised as insurance revenue for services provided during the period determined after all other adjustments above.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Subsequent measurement - Groups of contracts measured under the GMM and/or the VFA (continued)

Changes to the contractual service margin (continued)

For reinsurance contracts held, at the end of each reporting period, the carrying amount of the CSM is adjusted by the Group to reflect the effect of the following changes:

- (a) The effect of any new contracts added to the group.
- (b) Interest accreted on the carrying amount of the CSM.
- (c) Income recognised in profit or loss when the entity recognises a loss on initial recognition of an onerous group of underlying insurance contracts or on addition of onerous underlying insurance contracts to that group. A loss-recovery component is established or adjusted within the remaining coverage for reinsurance contracts held for the amount of income recognised.
- (d) Reversals of a loss-recovery component other than changes in the FCF of reinsurance contracts held.
- (e) Changes in the FCF, to the extent that the change relates to future service, unless the change results from a change in FCF allocated to a group of underlying insurance contracts that does not adjust the CSM for the group of underlying insurance contracts.
- (f) The effect of any currency exchange differences.
- (g) The amount recognised in profit or loss for insurance contract services received during the period, determined after all other adjustments above.

Income referred to in (c) above is calculated by multiplying the loss recognised on underlying insurance contracts by the percentage of claims on underlying insurance contracts that the Group expects to recover from the reinsurance contract held that is entered into before or at the same time as the loss is recognised on the underlying insurance contracts.

For the purposes of (c)–(e) above, when underlying insurance contracts are included in the same group with insurance contracts issued that are not reinsured, the Group applies a systematic and rational method of allocation to determine the portion of losses that relates to underlying insurance contracts.

Refer to the Reinsurance contracts held – Loss recovery component section below for loss-recovery component accounting.

The Group does not have any reinsurance contracts held measured under the GMM with underlying contracts measured under the PAA.

Interest accretion on the CSM:

Under the GMM, interest is accreted on the CSM using discount rates determined at initial recognition that are applied to nominal cash flows that do not vary based on the returns of underlying items (locked-in discount rates).

Adjusting the CSM for changes in the FCF relating to future service:

The CSM is adjusted for changes in the FCF measured applying the discount rates as specified above in the 'Changes in fulfilment cash flows' section.

Release of the CSM to profit or loss:

The amount of the CSM recognised in profit or loss for services in the period is determined by the allocation of the CSM remaining at the end of the reporting period over the current and remaining expected coverage period of the group of insurance contracts based on coverage units.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Subsequent measurement - Groups of contracts measured under the GMM and/or the VFA (continued)

Changes to the contractual service margin (continued)

The coverage period is defined as a period during which the entity provides insurance contract services. Insurance contract services include coverage for an insured event (insurance coverage), the generation of an investment return for the policyholder, if applicable (investment-return service) for the contracts under the GMM, and the management of underlying items on behalf of the policyholder (investment-related service) for the contracts under the VFA. The period of investment-return service or investment-related service ends at or before the date when all amounts due to current policyholders relating to those services have been paid. Investment-return services are provided only when an investment component exists in insurance contracts or the policyholder has a right to withdraw an amount, and the Group expects these amounts to include an investment return that is achieved by the Group by performing investment activities to generate that investment return.

For contracts issued, the Group determines the coverage period for the CSM recognition as follows:

- (a) For life insurance contracts, the coverage period corresponds to the policy coverage for mortality risk for life insurance policies and longevity risk for deferred annuities; and
- (b) For insurance contracts with investment components, the coverage period corresponds to the period in which insurance or investment return and investment related services are expected to be provided.

The total number of coverage units in a group is the quantity of coverage provided by the contracts in the group over the expected coverage period. In instances where multiple services are provided to a policyholder, the coverage units are calculated based on each rider, but aggregated to produce the total contract's coverage units. The coverage units are determined at each reporting period-end prospectively by considering:

- (a) The quantity of benefits provided by contracts in the group;
- (b) The expected coverage duration of contracts in the group; and
- (c) The likelihood of insured events occurring, only to the extent that they affect the expected duration of contracts in the group.

The Group uses the amount that it expects the policyholder to be able to validly claim in each period if an insured event occurs at the basis for the quantity of benefits.

The Group determines coverage units as follows:

- (a) For products under the "Traditional life and interest sensitive without guarantees" category, coverage units are determined based on the policies' face values that are equal to the fixed death benefit amounts;
- (b) For products under the "Unit linked life and interest sensitive with guarantees" category, coverage units are based on the fixed death benefits amounts (during the insurance coverage period) plus policyholders' account values;
- (c) For products under the "Annuities" category that are in the accumulation phase, coverage units are based on policy size (i.e., the value of the accumulated funds). When they are in the annuitisation phase, coverage units are based on the annuity payout. The coverage units were summed (weights are 50%/50%).

The Group reflects the time value of money in the allocation of the CSM to coverage units using discount rates that are applied to nominal cash flows that do not vary based on the returns of underlying items. For GMM contracts, these discount rates are determined at initial recognition, while for VFA contracts, current discount rates are applied.

For reinsurance contracts held, the CSM is released to profit or loss as services are received from the reinsurer in the period.

Coverage units for the proportionate term life reinsurance contracts are based on the insurance coverage provided by the reinsurer and are determined by the ceded policies' fixed face values taking into account new business projected within the reinsurance contract boundary.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Subsequent measurement - Groups of contracts measured under the GMM and/or the VFA (continued)

Changes to the contractual service margin (continued)

The coverage period for these contracts is determined based on the coverage of all underlying contracts whose cash flows are included in the reinsurance contract boundary. Refer to the 'Contract boundary' section within this Note above.

Onerous contracts - Loss component:

When adjustments to the CSM exceed the amount of the CSM, the group of contracts becomes onerous and the Group recognises the excess in insurance service expenses and records it as a loss component of the LRC.

When a loss component exists, the Group allocates the following between the loss component and the remaining component of the LRC for the respective group of contracts, based on the ratio of the loss component to the FCF relating to the expected future cash outflows:

- (a) Expected incurred claims and expenses for the period;
- (b) Changes in the risk adjustment for non-financial risk for the risk expired; and
- (c) Finance income (expenses) from insurance contracts issued.

The amounts of loss component allocation in (a) and (b) above reduce the respective components of insurance revenue and are reflected in insurance services expenses.

Decreases in the FCF in subsequent periods reduce the remaining loss component and reinstate the CSM after the loss component is reduced to zero. Increases in the FCF in subsequent periods increase the loss component.

Reinsurance contracts held – Loss-recovery component:

A loss-recovery component is established or adjusted within the asset for remaining coverage for reinsurance contracts held for the amount of income recognised in profit or loss when the Group recognises a loss on initial recognition of an onerous group of underlying insurance contracts or on addition of onerous underlying insurance contracts to that group.

Subsequently, the loss-recovery component is adjusted to reflect changes in the loss component of an onerous group of underlying insurance contracts discussed in the Onerous contracts – Loss component section above. The loss-recovery component is further adjusted, if required, to ensure that it does not exceed the portion of the carrying amount of the loss component of the onerous group of underlying insurance contracts that the Group expects to recover from the group of reinsurance contracts held.

The loss-recovery component determines the amounts that are presented as a reduction of incurred claims recovery from reinsurance contracts held and are consequently excluded from the reinsurance expenses determination.

Initial and subsequent measurement - Groups of contracts measured under the PAA

The Group uses the PAA for measuring contracts with a coverage period of one year or less. The PAA eligibility test was applied to risk-attaching reinsurance contracts, and it was concluded that the PAA can also be used for such contracts.

For insurance contracts issued, insurance acquisition cash flows are deferred and recognised over the coverage period of contracts in a group.

For insurance contracts issued, on initial recognition, the Group measures the LRC at the amounts of premiums received, less any acquisition cash flows paid and any amounts arising from the derecognition of the prepaid acquisition cash flows asset and the derecognition of any other relevant pre-recognition cash flows.

For reinsurance contracts held, on initial recognition, the Group measures the remaining coverage at the amount of ceding premiums paid.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Initial and subsequent measurement - Groups of contracts measured under the PAA (continued)

The carrying amount of a group of insurance contracts issued at the end of each reporting period is the sum of:

- (a) The LRC; and
- (b) The LIC, comprising the FCF related to past service allocated to the group at the reporting date.

The carrying amount of a group of reinsurance contracts held at the end of each reporting period is the sum of:

- (a) The remaining coverage; and
- (b) The incurred claims, comprising the FCF related to past service allocated to the group at the reporting date.

For insurance contracts issued, at each of the subsequent reporting dates, the LRC is:

- (a) Increased for premiums received in the period, excluding amounts that relate to premium receivables included in the LIC;
- (b) Decreased for insurance acquisition cash flows paid in the period;
- (c) Decreased for the amounts of expected premiums received recognised as insurance revenue for the services provided in the period; and
- (d) Increased for the amortisation of insurance acquisition cash flows in the period recognised as insurance service expenses.

For reinsurance contracts held, at each of the subsequent reporting dates, the remaining coverage is:

- (a) Increased for ceding premiums paid in the period; and
- (b) Decreased for the amounts of ceding premiums recognised as reinsurance expenses for the services received in the period.

The Group does not adjust the LRC for insurance contracts issued and the remaining coverage for reinsurance contracts held for the effect of the time value of money as insurance premiums are due within the coverage of contracts, which is one year or less.

There are no investment components within insurance contracts issued and reinsurance contracts held that are measured under the PAA.

For contracts measured under the PAA, the LIC is measured similarly to the LIC's measurement under the GMM. The health insurance contracts typically have a settlement period of one year and less, and therefore the future cash flows are not adjusted for the time value of money. For property and casualty and group life insurance contracts, future cash flows are adjusted for the time value of money since these insurance contracts sometimes have claims with a settlement period of over one year. Some of these insurance contracts permit the Group to sell (usually damaged) property acquired in settling a claim (salvage). The Group may also have the right to pursue third parties for payment of some or all costs (subrogation). The estimated cost of claims includes a deduction for the expected value of salvage and other recoveries.

If facts and circumstances indicate that a group of insurance contracts measured under the PAA is onerous on initial recognition or becomes onerous subsequently, the Group increases the carrying amount of the LRC to the amounts of the FCF determined under the GMM with the amount of such an increase recognised in insurance service expenses, and a loss component is established for the amount of the loss recognised. Subsequently, the loss component is remeasured at each reporting date as the difference between the amounts of the FCF determined under the GMM relating to the future service and the carrying amount of the LRC without the loss component. Where applicable, resulting changes in the loss component are disaggregated between insurance service expenses and insurance finance income or expenses for the effect of the time value of money, financial risk and effect of changes therein.

When a loss is recognised on initial recognition of an onerous group of underlying insurance contracts or on addition of onerous underlying insurance contracts to that group, the carrying amount of the asset for remaining coverage for reinsurance contracts held measured under the PAA is increased by the amount of income recognised in profit or loss and a loss-recovery component is established or adjusted for the amount of income recognised. The referred income is calculated by multiplying the loss recognised on underlying insurance contracts by the percentage of claims on underlying insurance contracts that the Group expects to recover from the reinsurance contract held that are entered into before or at the same time as the loss is recognised on the underlying insurance contracts.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(f) Measurement (continued)

Initial and subsequent measurement - Groups of contracts measured under the PAA (continued)

When underlying insurance contracts are included in the same group with insurance contracts issued that are not reinsured, the Group applies a systematic and rational method of allocation to determine the portion of losses that relates to underlying insurance contracts.

Where applicable, changes in the loss-recovery component are disaggregated between net income from reinsurance contracts held (refer to note 2.15(g)) and insurance finance income or expenses for the effect of the time value of money, financial risk and effect of changes therein in proportion to the disaggregation applied to the changes in the underlying loss component.

The Group does not have any reinsurance contracts held measured under the PAA with underlying contracts measured under the GMM.

(g) Amounts recognised in comprehensive income

Insurance service result from insurance contracts issued

Insurance revenue

As the Group provides services under the group of insurance contracts, it reduces the LRC and recognises insurance revenue. The amount of insurance revenue recognised in the reporting period depicts the transfer of promised services at an amount that reflects the portion of consideration the Group expects to be entitled to in an exchange for those services.

For contracts measured under the GMM and/or the VFA, insurance revenue comprises the following:

- ▶ Amounts relating to the changes in the LRC:
 - (a) Insurance claims and expenses incurred in the period measured at the amounts expected at the beginning of the period, excluding:
 - amounts related to the loss component;
 - repayments of investment components and policyholder rights to withdraw an amount;
 - amounts of transaction-based taxes collected in a fiduciary capacity;
 - insurance acquisition expenses; and
 - amounts related to the risk adjustment for non-financial risk (see (b));
 - (b) Changes in the risk adjustment for non-financial risk, excluding:
 - changes included in insurance finance income (expenses);
 - changes that relate to future coverage (which adjust the CSM); and
 - amounts allocated to the loss component;
 - (c) Amounts of the CSM recognised in profit or loss for the services provided in the period;
 - (d) Experience adjustments arising from premiums received in the period that relate to past and current service and related cash flows such as insurance acquisition cash flows and premium-based taxes; and
 - (e) Other amounts, including any other pre-recognition cash flows assets derecognised at the date of initial recognition.
- ▶ Insurance acquisition cash flows recovery is determined by allocating the portion of premiums related to the recovery of those cash flows on the basis of the passage of time over the expected coverage of a group of contracts.

For groups of insurance contracts measured under the PAA, the Group recognises insurance revenue based on the passage of time over the coverage period of a group of contracts.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(g) Amounts recognised in comprehensive income (continued)

Insurance service result from insurance contracts issued (continued)

Insurance service expenses

Insurance service expenses include the following:

- (a) Incurred claims and benefits excluding investment components reduced by loss component allocations;
- (b) Other incurred directly attributable insurance service expenses, including amounts of any other pre-recognition cash flows assets (other than insurance acquisition cash flows) derecognised at the date of initial recognition;
- (c) Amortisation of insurance acquisition cash flows;
- (d) Changes that relate to past service (i.e. changes in the FCF relating to the LIC);
- (e) Changes that relate to future service (i.e. losses/reversals on onerous groups of contracts from changes in the loss components); and
- (f) Insurance acquisition cash flows assets impairment.

For contracts measured under the GMM and/or the VFA, amortisation of insurance acquisition cash flows is reflected in insurance service expenses in the same amount as insurance acquisition cash flows recovery reflected within insurance revenue as described above.

For contracts measured under the PAA, amortisation of insurance acquisition cash flows is based on the passage of time.

Other expenses not meeting the above categories are included in other operating expenses in the consolidated statement of income or loss.

Insurance service result from reinsurance contracts held

Net income (expenses) from reinsurance contracts held

The Group presents financial performance of groups of reinsurance contracts held on a net basis in net income (expenses) from reinsurance contracts held, comprising the following amounts:

- (a) Reinsurance expenses;
- (b) Incurred claims recovery;
- (c) Other incurred directly attributable insurance service expenses;
- (d) Changes that relate to past service – changes in the FCF relating to incurred claims recovery;
- (e) Effect of changes in risk of reinsurer non-performance;
- (f) Amounts relating to accounting for onerous groups of underlying insurance contracts issued:
 - i. Income on initial recognition of onerous underlying contracts;
 - ii. Reinsurance contracts held under the GMM: reversals of a loss-recovery component other than changes in the FCF of reinsurance contracts held; and
 - iii. Reinsurance contracts held under the GMM: changes in the FCF of reinsurance contracts held from onerous underlying contracts.

Reinsurance expenses are recognised similarly to insurance revenue. The amount of reinsurance expenses recognised in the reporting period depicts the transfer of received services at an amount that reflects the portion of ceding premiums the Group expects to pay in exchange for those services.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(g) Amounts recognised in comprehensive income (continued)

Insurance service result from reinsurance contracts held (continued)

Net income (expenses) from reinsurance contracts held (continued)

For contracts measured under the GMM and/or the VFA, reinsurance expenses comprise the following amounts relating to changes in the remaining coverage:

- (a) Claims and other directly attributable expenses recovery in the period, measured at the amounts expected to be incurred at the beginning of the period, excluding:
 - Amounts allocated to the loss-recovery component;
 - Repayments of investment components;
 - Amounts related to the risk adjustment for non-financial risk (see (b));
- (b) Changes in the risk adjustment for non-financial risk, excluding:
 - Changes included in finance income (expenses) from reinsurance contracts held;
 - Changes that relate to future coverage (which adjust the CSM);
 - Amounts allocated to the loss-recovery component;
- (c) Amounts of the CSM recognised for the services received in the period; and
- (d) Experience adjustments – arising from premiums paid in the period other than those that relate to future service.

For groups of reinsurance contracts held measured under the PAA, the Group recognises reinsurance expenses based on the passage of time over the coverage period of a group of contracts.

Ceding commissions that are not contingent on claims of the underlying contracts issued reduce ceding premiums and are accounted for as part of reinsurance expenses. Ceding commissions that are contingent on claims of the underlying contracts issued reduce incurred claims recovery.

Insurance finance income or expenses

Insurance finance income or expenses comprise the change in the carrying amount of the group of insurance contracts arising from:

- (a) The effect of the time value of money and changes in the time value of money; and
- (b) The effect of financial risk and changes in financial risk.

For contracts measured under the GMM, the main amounts within insurance finance income or expenses are:

- (a) Interest accreted on the FCF and the CSM; and
- (b) The effect of changes in interest rates and other financial assumptions.

For contracts measured under the VFA, insurance finance income or expenses comprise changes in the value of underlying items (excluding additions and withdrawals).

For contracts measured under the PAA, the main amounts within insurance finance income or expenses are:

- (a) Interest accreted on the LIC; and
- (b) The effect of changes in interest rates and other financial assumptions.

The Group disaggregate changes in the risk adjustment for non-financial risk between insurance service result and insurance finance income or expenses.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(g) Amounts recognised in comprehensive income (continued)

Insurance finance income or expenses (continued)

For the contracts measured under the VFA and the PAA, the Group includes all insurance finance income or expenses for the period in profit or loss (i.e. the profit or loss option (the PL option) is applied).

For the contracts measured using the GMM, except for those supported by investments measured at fair value through profit or loss, the OCI option is applied. The investments held by the Group that are used to support the GMM portfolio are typically measured at either amortised cost or at fair value through OCI, therefore the use of the OCI option results in the elimination of accounting mismatches with the associated assets. When the OCI option is applied, the impact of the change in discount rate is posted to the OCI. The difference between the liability measured on current rates and the liabilities measured on locked-in rates at any point in time represent the accumulation of amounts in OCI. Interest accreted on the BEL and CSM are also posted to profit or loss for these portfolios.

Groups of insurance and reinsurance contracts, including the CSM, that generate cash flows in a foreign currency are treated as monetary items. Where these groups of insurance and reinsurance contracts generate cash flows in multiple currencies, the Group has opted to maintain the underlying cash flows in their transactional currencies. The risk adjustment is also denominated in multiple currencies reflecting the currencies of its related fulfilment cash flows. The CSM, loss component, and the loss recovery component within each insurance and reinsurance group is however assigned a single currency ("the CSM Currency") in order to operate the mechanics of IFRS 17. This currency is determined separately for each insurance or reinsurance group based on the predominant currency in which the underlying cash flows are denominated.

The impact of adjusting the CSM, loss component, or loss recovery component in the CSM Currency due to changes in the exchange rate between the currencies of the underlying cash flows and the CSM Currency are accounted for as changes in financial risk - i.e., within effects of changes in interest rates and other financial assumptions. Applying IAS 21 at the end of the reporting period, the carrying amount of the group of insurance or reinsurance contracts (including the CSM, loss component, or loss recovery component) is translated into the functional currency at the closing rate, with the resulting impact presented as foreign exchange differences. Both the foreign exchange differences and changes in financial risk are accounted for within 'finance expenses from insurance contracts issued' for insurance contracts and 'finance income from reinsurance contracts held' for reinsurance contracts.

(h) Classification

The Group issues contracts that transfer insurance risk or financial risk or both. Insurance contracts are those contracts that transfer significant insurance risk. Such contracts may also transfer financial risk. As a general guideline, the Group defines as significant insurance risk the possibility of having to pay benefits on the occurrence of an insured event that are at least 10% more than the benefits payable on a present value basis if the insured event did not occur.

Investment contracts are those contracts that transfer financial risk with no significant insurance risk.

A number of insurance contracts contain a discretionary participation feature, which entitles the holder to receive, as a supplement to guaranteed benefits, additional benefits or bonuses:

- a) That are likely to be a significant portion of the total contractual benefits;
- b) Whose amount or timing is contractually at the discretion of the Group; and
- c) That are contractually based on:
 - (i) the performance of a specified pool of contracts or a specified type of contract;
 - (ii) realised and/or unrealised investment returns on a specified pool of assets held by the Group; or
 - (iii) the profit or loss of the Group, fund or other entity that issues the contract.

The terms and conditions of these contracts set out the basis for the determination of the amounts on which discretionary benefits are based and within which the Group may exercise its discretion as to the quantum and timing of their payments to contract holders, which will be subject to the advice of the Group's actuary or a locally appointed actuary.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.15 Insurance and investment contracts (continued)

(i) Investment contracts

The Group issues investment contracts including deposit administration contracts and individual deferred annuity contracts. Premiums are recognised directly as liabilities. These liabilities are increased by credited interest or change in the unit prices and are decreased by policy administration fees, mortality and surrender charges, and any withdrawals. Revenue consists of investment income and interest credited is treated as an expense.

(j) Reinsurance contracts held

Contracts entered into by the Group with reinsurers under which the Group is compensated for losses on one or more contracts issued by the Group and that meet the classification requirements for insurance contracts are classified as reinsurance contracts held.

Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Group under which the contract holder is another insurer (inward reinsurance) are included with insurance contracts.

(k) Receivables and payables other than those for contracts under IFRS 17

Receivables and payables are recognised when due. These include amounts due to and from agents and brokers. If there is objective evidence that the receivable is impaired, the Group reduces the carrying amount of the receivable accordingly and recognises that impairment loss in the consolidated statement of income.

(l) Insurance finance reserve

The insurance finance reserve comprises the cumulative insurance finance income and expenses recognised in other comprehensive income. If the Group derecognises a contract without direct participation features as a result of a transfer to a third party or a contract modification, then any remaining amounts of accumulated other comprehensive income for the contract are reclassified to profit or loss as a reclassification adjustment.

2.16 Financial liabilities

Financial liabilities in the consolidated statement of financial position comprise borrowings and repurchase agreements.

(a) Borrowings

Borrowings are recognised initially at fair value, plus directly attributable transaction costs. After initial recognition, interest-bearing loans are subsequently measured at amortised cost using the effective interest rate (EIR) method. Gains and losses are recognised in the consolidated statement of income when the liabilities are derecognised as well as through the EIR amortisation process.

The Group derecognises a loan when its contractual obligations are discharged, cancelled or have expired. The Group also derecognises a loan when its terms are modified and the cash flows of the modified borrowing is substantially different, in which case a new loan based on the modified terms is recognised at fair value. On derecognition of the loan, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in the consolidated statement of income.

(b) Repurchase agreements

Securities sold under agreements to repurchase (repurchase agreements) are treated as collateralised financing transactions. The difference between the sale and repurchase price is treated as interest and accrued over the life of the agreements using the EIR method.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.17 Taxation

Taxation in the consolidated statement of income comprises current and deferred income tax.

Current income tax charges are based on taxable profits for the year, which differ from the profit before tax reported because it excludes items that are taxable or deductible in other years, and items that are never taxable or deductible. The Group's liability for current tax is calculated at tax rates that have been enacted or substantively enacted at the date of the consolidated statement of financial position.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Currently enacted or substantively enacted tax rates are used in the determination of deferred income tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax is charged or credited to the consolidated statement of income, except where it relates to items charged or credited to the consolidated statement of comprehensive income, in which case, deferred tax is also dealt with in the consolidated statement of comprehensive income.

2.18 Employee benefits

(a) Pension plans

The Group operates a number of defined benefit and defined contribution plans, the assets of which are held in separate trustee-administered funds. The plans are generally funded by payments from employees and by the relevant Group companies after taking account of the recommendations of the external qualified actuaries.

The plans are governed by trust/fund deeds and rules and are administered in accordance with the laws of the jurisdiction in which the plan resides. Responsibility for the governance of the plans, including investment strategies, lies with the Board of Trustees/Foundation.

A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current or prior periods.

The asset or liability recognised in the consolidated statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the consolidated statement of financial position date less the fair value of plan assets. Plan assets exclude any insurance contracts issued by the Group.

For defined benefit plans, the pension accounting costs are assessed using the projected unit credit method. Under this method, the cost of providing pensions is charged to the consolidated statement of income so as to spread the regular cost over the service lives of employees in accordance with the advice of a qualified actuary, who carries out full valuations of the plans every three years. The pension obligation is measured as the present value of the estimated future cash outflows using interest rates of government securities which have terms to maturity approximating the terms of the related liability. Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses and the return on plan assets (excluding interest), are recognised immediately through other comprehensive income in the consolidated statement of comprehensive income.

The defined benefit plans mainly expose the Group to actuarial risks such as investment risk, interest rate risk and longevity risk.

The Group's contributions to the defined contribution pension plans are charged to the consolidated statement of income in the year to which they relate.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.18 Employee benefits (continued)

(b) Post-retirement medical benefit obligations

The Group's subsidiaries in Trinidad and Tobago and the Dutch Caribbean provide post-retirement medical benefits to its permanent employees who retire from active service, their spouses and their dependents. The entitlement to these benefits is based on the employee remaining in service up to retirement age or leaving service due to ill health. The expected costs of these benefits are accrued over the period of employment, using a methodology similar to that for defined benefit plans. All actuarial gains and losses are recognised immediately through other comprehensive income in the consolidated statement of comprehensive income. External qualified actuaries carry out a valuation of these obligations.

(c) Cash-based long-term performance incentive plan

The Group operates a cash-based long-term performance incentive plan for eligible executives. Accruals are made annually based on the ultimate expected payments to eligible executives.

(d) Employee share ownership plan ('ESOP')

The employees of subsidiaries incorporated in Trinidad and Tobago have the option to receive their bonuses in cash or to instead substitute 40% or more of that cash bonus for the equivalent value of ordinary shares of the company, purchased on the open market, in accordance with the terms outlined in the Trust Deed governing an approved ESOP. The Group recognises an expense within staff costs when bonuses are awarded. When the cash portion of the bonuses are paid to employees, the Trustees simultaneously purchase and hold the allocated shares. Employees or their appointed legal representatives are entitled to receive their shares upon the employee's cessation of employment, retirement, death, or upon the request of the employee if 5 years have elapsed since the shares were allocated. Dividends received by the Trustees with respect to allocated shares held are paid over to employees within 28 days of receipt. The ESOP is an equity-settled plan, with the associated unallocated shares (treasury shares) reflected in the consolidated financial statements as a deduction to share capital. This amount is not material to the Group's consolidated financial statements.

(e) Bonus plans

The Group recognises a liability and an expense for bonuses based on a formula that takes into consideration the profit attributable to the Group's shareholders after certain adjustments. The Group recognises a provision where contractually obligated or where there is a past practice that has created a constructive obligation.

2.19 Provisions

Provisions are made when the Group has a present legal or constructive obligation as a result of past events, for which it is more likely than not that an outflow of resources will be required to settle the obligation, and the amount has been reliably estimated.

2.20 Revenue recognition

Revenue comprises the fair value for services rendered after eliminating revenue within the Group. Revenue is recognised as follows:

- (a) Insurance revenue - This is recognised in accordance with the requirements of IFRS 17 as laid out in Note 2.15.
- (b) Investment income - Interest income is recognised using the effective interest method. Dividend income is recognised when the right to receive payment is established.
- (c) Rental Income
- (d) Realised and unrealised investment gains and losses
- (e) Commission income from brokerage activities and fronting contracts
- (f) Fee income - Fees are earned from fronting contracts, the management of the assets of the segregated funds and deposit administration funds and from general policy administration and surrenders. Fees are recognised in the period in which the services are rendered. For the asset management companies in the Group, portfolio, asset management fees and other management advisory and service fees are recognised based on the applicable service contracts over the period in which the service is provided. Management fees and commissions arising from negotiating, or participating in the negotiation of a transaction for a third party are recognised on completion of the underlying transaction.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.21 Leases

The Group as a lessee

The Group mainly leases various office space, motor vehicles and equipment used in its operations. Rental contracts for these leases are typically made for fixed periods but may have extension options, which is described below. Some contracts contain lease and non-lease components, which are accounted for as separate components based on the stand-alone prices stated in the contracts.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants and the leased assets may not be used as security for borrowing purposes.

The Group applies a single recognition and measurement approach to all leases, except for short-term leases and leases of low-value assets. At lease commencement date, the Group recognises a right-of-use asset and a lease liability in the consolidated statement of financial position.

The right-of-use asset is initially measured at cost, which comprises the initial measurement of the lease liability, any initial direct costs incurred by the Group, an estimate of any costs to dismantle and remove the asset at the end of the lease, and any lease payments made in advance of the lease commencement date (net of any incentives received). Subsequent to initial measurement, the right-of-use asset is depreciated on a straight-line basis from the lease commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life. The Group also assesses the right-of-use asset for impairment when such indicators exist. The Group does not revalue any of its right-of-use assets.

The lease liability is initially measured at the present value of the lease payments that are not paid at the lease commencement date, discounted using the interest rate implicit in the lease. If the interest rate implicit in the lease cannot be readily determined, the lessee's incremental borrowing rate is used, being the rate the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions. Lease payments included in the measurement of the lease liability comprise the following:

- ▶ fixed lease payments (including in-substance fixed payments), less any lease incentives;
- ▶ variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- ▶ lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option; and
- ▶ penalty payments for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made.

The Group remeasures the lease liability when there is a change in future lease payments arising from a change in an index or rate, or if the Group changes its assessment of whether it will exercise an extension or termination option. Extension and termination options are included in a number of leases across the Group. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in the consolidated statement of income if the carrying amount of the right-of-use asset has been reduced to zero.

Variable lease payments that do not depend on an index or a rate are not included in the measurement of the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments. The Group did not have any variable lease payments that do not depend on an index or a rate for the period ended 31 December 2025 (2024: nil).

The Group applies the short-term lease recognition exemption to its short-term leases i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option. It also applies the lease of low-value assets to leases that are considered to be low value. The Group recognises the lease payments associated with these leases as an expense on a straight line basis over the lease term.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

2. Material accounting policies (continued)

2.21 Leases (continued)

The Group as a lessor

The Group leases out its investment properties. The Group has classified these leases as operating leases, because they do not transfer substantially all of the risks and rewards incidental to the ownership of the assets. Rental income arising is accounted for on a straight-line basis over the lease term and is included in other income in the consolidated statement of income.

2.22 Dividend distributions

Dividend distributions to the Company's shareholders are recognised as an appropriation in the Group's consolidated financial statements in the period in which the dividends are approved by the Group's Board of Directors.

2.23 Other finance charges

Finance charges are recognised as an expense in the period in which they are incurred except to the extent that they are capitalised when directly attributable to the acquisition, construction or production of an investment property or in developing properties for sale.

2.24 Assets under management

The Group provides custody and trustee discretionary investment management services to third parties. Such assets under management represent the managed funds administered by the Trust company.

2.25 Subscriptions and redemptions on mutual funds portfolio

(a) Subscriptions - Units relating to the various pools of mutual funds consolidated in the Group's financial statements could be subscribed based on the net asset value per unit of the underlying funds determined on each business day.

(b) Distributions - The net income and net realised capital gains of the various pools of mutual funds are calculated and accrued to the investor daily and distributed monthly. Investors have the option either to receive a cash distribution or to reinvest income distributions into units at the prevailing subscription price as at the date of distribution.

(c) Redemptions - Units relating to the various pools of mutual funds consolidated in the Group's financial statements are redeemed at a price per unit based on the net asset value of the underlying funds published on the date that the request is made.

2.26 Assets held for sale

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and investment property that are carried at fair value and contractual rights under insurance contracts, which are specifically exempt from this requirement.

Depreciation and amortisation cease once assets are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

The assets and liabilities of a disposal group classified as held for sale are presented separately from the other assets and liabilities in the consolidated statement of financial position.

A discontinued operation is a component of the entity that has been classified as held for sale and that represents a separate major line of business or geographical area of operations, or is part of a single co-ordinated plan to dispose of such a line of business or area of operations. The results of discontinued operations are presented separately in the consolidated statement of income.

2.27 Comparative information

Where necessary, comparative data has been adjusted to conform with changes in presentation in the current year.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars
(Continued)

3. Critical accounting estimates and judgements in applying accounting policies

The Group makes estimates and assumptions that may affect the reported amounts of assets and liabilities during the succeeding financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Insurance contracts

Definition and classification

Definition and classification determines whether contracts are in the scope of IFRS 17 and, for contracts determined to be in scope of IFRS 17, what measurement model is applicable.

Determining whether a contract issued accepts significant insurance risk and, similarly, whether a reinsurance contract held transfers significant insurance risk requires judgement. Refer to Note 2.15(b) which gives details on how the Group determines the classification of insurance products with investment components as insurance or investment contracts.

Determining whether a contract issued that does not transfer significant insurance risk meets the definition of an investment contract with discretionary participation features requires judgement. The Group does not issue any investment contracts with discretionary participation features.

Determining whether contracts that were determined to be in the scope of IFRS 17 meet the definition of an insurance contract with direct participation features requires judgement:

- (a) Whether the pool of underlying items is clearly identified;
- (b) Whether amounts that an entity expects to pay to the policyholders constitute a substantial share of the fair value returns on the underlying items; and
- (c) Whether the Group expects the proportion of any change in the amounts to be paid to the policyholders that vary with the change in fair value of the underlying items to be substantial.

Significant judgement is applied to determine whether the proportion to be paid by the Group to life contract policyholders and to direct participating contract policyholders is substantial.

The Group applies the PAA to some insurance contracts with a coverage period of more than one year. The eligibility assessment involved significant judgement on whether the application of the PAA will produce a measurement of the liability for the LRC that would not differ materially from the one that would be produced applying the GMM.

Several subsidiaries in the Group act as agents in relation to the insurance contract services being provided by other parties via fronting arrangements. Where the Group has determined that it retains no credit or insurance risk on these contracts, the assets and liabilities arising out of these arrangements are not accounted for under IFRS 17, but are instead accounted for under the relevant IFRS Accounting Standard. Where the Group retains insurance or credit risk, these arrangements are accounted for as 100% reinsured contracts.

Unit of account

Judgement is involved in combination of insurance contracts and separation of distinct components, however the Group neither separated components of its insurance contracts nor combined any insurance contracts.

Judgements involved in the identification of portfolios of contracts, as required by paragraph 14 of IFRS 17 (that is, having similar risks and being managed together) are not an area of significant judgement for the Group. This is due to the Group historically managing its insurance and reinsurance portfolios in a way that, consistent with regulatory considerations, clearly distinguishes groups of products by their associated risks.

Judgement is required in aggregating insurance contracts issued on initial recognition into groups of onerous contracts, groups of contracts with no significant possibility of becoming onerous and groups of other contracts. A similar grouping assessment is required for reinsurance contracts held.

For contracts measured under the PAA, the assessment of the likelihood of adverse changes in applicable facts and circumstances is an area of judgement.

(a) Insurance contracts (continued)

Unit of account (continued)

For insurance contracts issued measured under the PAA, management judgement is required to assess whether facts and circumstances indicate that a group of contracts has become onerous. Further, judgement is required to assess whether facts and circumstances indicate any changes in the onerous group's profitability and whether any loss component remeasurement is required. In 2024 and 2025, the Group did not identify any facts or circumstances that might have indicated that a group of contracts measured under the PAA had become onerous. All contracts measured by the Group in 2024 and 2025 under the PAA were determined to be non-onerous on initial recognition.

Measurement - Fulfilment cash flows

The concept of a contract boundary is used to determine which future cash flows should be considered in the measurement of a contract in the scope of IFRS 17. Judgement is involved to determine when the Group is capable of repricing the entire contracts to reflect the reassessed risks, when policyholders are obliged to pay premiums and when premiums reflect risks beyond the coverage period. Only those liabilities or assets relating to expected premiums or claims driven by substantive rights and obligations are recognised within the boundary of the insurance contract. The Group applied judgement to the determination of the contract boundaries of several deferred annuity products with guaranteed annuitisation rates.

The Group uses judgement to determine which cash flows within the boundary of insurance contracts are those that relate directly to fulfilment of the contract. The Group performs regular expense studies and uses judgement to determine the extent to which fixed and variable overheads are directly attributable to fulfilling insurance contracts. Refer to Note 3(d).

Financial performance

The Group applied significant judgements in the following aspects of the determination of the CSM amounts that were recognised in profit or loss in 2024 and 2025:

- (a) For individual life GMM contracts without any accumulating Fund - coverage units are determined based on the quantity of benefits provided via the Face Amount of the coverage.
- (b) For individual life contracts that have an accumulated Fund Balance, coverage units are determined based on the quantity of benefits provided via the Face Amount of the coverage plus the Fund Value.
- (c) For annuity contracts that are still in the accumulation phase, coverage units are determined based on the value of the fund accumulated to date.
- (d) For annuity contracts that are in the annuitisation phase, coverage units are determined based on the value of expected annuity payout.

In performing the above determination, management applied judgement that might significantly impact the CSM carrying values and amounts of the CSM allocation recognised in profit or loss for the period.

Contracts measured under the Fair Value Approach

The Group applied the fair value approach to all long-term insurance and reinsurance contracts in force as at 31 December 2021. The Group applied significant judgement in determining the transition amounts under this approach.

Applying the fair value approach, the Group determined the CSM as at 1 January 2022 to be the difference between the fair value of a group of insurance contracts, measured in accordance with IFRS 13, 'Fair Value Measurement' (IFRS 13), and its FCF at the transition date. The Group did not apply the deposit floor when measuring insurance contracts when using the fair value approach on transition.

The fair value of an insurance liability is the price that a market participant would be willing to pay to assume the obligation and the remaining risks of the in-force contracts as at the transition date. Where available, recent market transactions were used to estimate the fair value of groups of contracts. In the absence of recent market transactions for similar contracts, a present value technique was used to value groups of contracts.

3. Critical accounting estimates and judgements in applying accounting policies (continued)

(a) Insurance contracts (continued)

Contracts measured under the Fair Value Approach (continued)

In estimating the fair value of groups of insurance contracts, the following considerations were applied:

- a. only future cash flows within the boundaries of the insurance contracts were included in the fair value estimation, excluding future renewals and new business that would be outside the contract boundary of the contracts under IFRS 17;
- b. assumptions about expected future cash flows and risk allowances were adjusted for the market participant's view, as required by IFRS 13; and
- c. other sources of profit were included to reflect what a market participant would require for accepting obligations under insurance contracts, beyond the risk adjustment for non-financial risk.

Given the lack of a liquid and observable market of insurance liabilities in the Caribbean, the fair value of insurance contracts was estimated using a method consistent with the income approach. There are two techniques that is consistent with this namely: the adjusted fulfilment cash flows and embedded or appraisal value. The group used the adjusted fulfilment cash flows as it is similar to the technique used to determine the fulfilment cash flows; however, adjusted to reflect the perspective of a market participant (IFRS 13) rather than the entity's view (IFRS 17).

The Group used significant judgement to determine adjustments required to reflect the market participant's view, and it considered the following:

<i>Definition and classification</i>	<p>The following assessments were performed using the criteria described in note 3, based on the information available as at the transition date:</p> <ol style="list-style-type: none">a. An assessment of whether a contract issued that does not transfer significant insurance risk meets the definition of an investment contract with discretionary participation features within the scope of IFRS 17; andb. An assessment of whether an insurance contract issued meets the definition of an insurance contract with direct participation features.
<i>Discount rates</i>	<p>The discount rates at the dates of initial recognition were determined at the transition date, as described in Note 3(a). The determination of an appropriate market discount rate to calculate the fair value at initial recognition included the application of the Group's own credit risk. This was calculated as a percentage of the Group's FCF. It was incorporated as a reduction to the Group's FCF, to derive the adjusted fulfilment cash flows (AFCF). The Group also included its reported Capital Adequacy requirements as of 31 December, 2021 to determine the Cost of Capital (COC). The COC was then calculated as the discounted value of the base solvency at the hurdle rate and applying a cost of capital factor.</p> <p>The Target Available Capital was calculated as the base solvency buffer, net of diversification benefit, multiplied by the target capital ratio (175%). This was further reduced by the Risk Adjustment for territories where the Capital regime is based solely on the Best Estimate Liability, though for the others, the Risk Adjustment reduction was not applied. The COC was then calculated as the discounted value of the base solvency at the hurdle rate and applying a cost of capital factor.</p>
<i>FCF</i>	<p>The FCF were estimated prospectively as at the transition date, and were determined as the present value of the Group's cash flows, consistent with the typical actuarial approach to determining the best estimate liability and risk adjustment. The ratios of Capital Adequacy risk components to the FCF were used to estimate the Group's risk components for the life of the business. The base solvency was calculated as the sum of the risk components. The Target Available Capital was calculated as the base solvency buffer net of diversification benefit multiplied by the target capital ratio, less Risk Adjustment.</p>
<i>CSM</i>	<p>The CSM (for insurance contracts issued) were estimated to be the difference between the fair value of a group of insurance contracts, measured in accordance with IFRS 13 as described above, and its FCF at the transition date. All relevant sources of required profit were considered, particularly for blocks of business that have significant additional capital considerations. The profit margin was calculated as the sum of COC, Risk Provision release and the other sources of profit, with each item in the profit margin calculation discounted at the hurdle rate.</p>

(a) Insurance contracts (continued)

Discount rates

A mix of the bottom-up and top-down approaches was applied in the determination of the discount rates for different territories.

The bottom-up approach was used to derive the discount rate for the cash flows of all territories except for the Dutch Caribbean. Under this approach, the discount rate is determined as the government yield curve for the relevant territory, which is adjusted for a credit risk premium and an illiquidity premium. The credit risk premium is quantified by finding the average spread between the government yield curve and that of the US Treasury on the assumption that the US Treasury yield curve is risk free. The illiquidity premium is determined by differences in liquidity characteristics between the financial assets used to derive the government yield and the relevant liability cash flows, as illustrated by government bond bid-ask spreads. The government yield curve and the relevant liability are denominated in the same currency as the product being measured for the portfolios denominated in Trinidad & Tobago dollars and Jamaican dollars, with the Trinidad & Tobago curve used as a proxy for portfolios denominated in all other currencies. Given the limited term of the government yield curves, for the unobservable period, the yield curve was interpolated between an ultimate rate and the last observable point using the Smith-Wilson method.

The ultimate rate for the Trinidad & Tobago curve and the Jamaica curve was 7.6% (2024: 7.6%) and 10.0% (2024: 11.5%), respectively.

The top-down approach was used to derive the discount rate for the cash flows within the Dutch Caribbean. One curve was used for Curacao and Aruba due to the similarities in corporate and retail interest rates, the interconnectedness of the islands, identical exchange rate regimes and similar statuses within the Dutch Kingdom. Under this approach, the discount rate is determined based on a combination of a local currency yield curve and a US Treasury yield curve, in keeping with the standard financial profile for life insurance portfolios in the Dutch Caribbean. For the local currency yield curve, observations of interest rates within the Dutch Caribbean market were used as a starting point. The observations included time deposit rates from commercial banks, interest rates on commercial loans, and mortgage interest rates from various financial institutions. Given that there is no active secondary market for local investments, a specified Illiquidity Premium was not considered necessary. The US Treasury curve represents a risk free curve therefore no credit spreads were deducted. An Illiquidity Premium was added to this curve to account for the lesser liquidity of the Group's insurance portfolio versus US Treasury investments.

Observable market information was used from 2010 to capture the low interest environment that much of the world, including the Caribbean, has been in since the 2008 financial crisis. Going back further than this point was considered inappropriate as it is not reflective of the current economic environment.

Cash flows varying based on underlying items are discounted using a discount rate that reflects the variability of the underlying assets. Insurance contracts with direct participating features include investment components where cash flows vary based on the return of investment assets. The cash flows arising from the investment component are discounted using the expected return of the assets supporting the investment component. There are limited financial guarantees in these products. The liabilities associated with these guarantees are measured using a market consistent deterministic interest scenario.

The weighted average yield curves used to discount the estimates of future cash flows that do not vary based on the returns of the underlying items are as follows:

Estimates of future cash flows to fulfil insurance contracts

Included in the measurement of each group of contracts in the scope of IFRS 17 are all the future cash flows within the boundary of each group of contracts. The estimates of these future cash flows are based on probability weighted expected future cash flows. The Group estimates which cash flows are expected and the probability that they will occur as at the measurement date. In making these expectations, the Group uses information about past events, current conditions and forecasts of future conditions. The Group's estimate of future cash flows is based on a best estimate deterministic scenario that specifies the amount, timing and probability of cash flows.

Expenses related cash flows are determined at a cohort level and are allocated on a systematic basis similar to the activity based costing method. The Group has determined that this method results in a systematic and rational allocation. Similar methods are consistently applied to allocate expenses of a similar nature. Acquisition cash flows and expenses of an administrative policy maintenance nature are allocated to groups of contracts based on the number of contracts initiated for the period, and in force for the period, respectively. Claims settlement related expense are allocated based on the number of claims incurred.

For the long-term insurance contracts without investment components, uncertainty in the estimation of future claims and benefit payments and premium receipts arises primarily from the unpredictability of long-term changes in the mortality rates, the variability in the policyholder behaviour and uncertainties regarding future inflation rates and expenses growth.

Uncertainty of future claims and benefit payments arises primarily from the variability in policyholder behaviour. The interest rate guarantee embedded in insurance contracts was measured using a best estimate deterministic scenario, representing the most likely future interest rate environment.

For the short-term insurance contracts, uncertainty in the estimation of future claims and benefit payments arises primarily from the severity and frequency of claims and uncertainties regarding future inflation rates leading to claims and claims-handling expenses growth.

Assumptions used to develop estimates about future cash flows are reassessed at each reporting date and adjusted where required.

Methods used to measure the risk adjustment for non-financial risk

The risk adjustment for non-financial risk is the compensation that is required for bearing the uncertainty about the amount and timing of cash flows that arises from non-financial risk as the insurance contract is fulfilled. Because the risk adjustment represents compensation for uncertainty, estimates are made on the degree of diversification benefits and expected favourable and unfavourable outcomes in a way that reflects the Group's degree of risk aversion. The Group estimates an adjustment for non-financial risk separately from all other estimates.

For insurers within the Life, Health, and Pensions Segment, the risk adjustment was calculated on a full contract basis, thereby considering risks that may emerge over the entire life of the insurance contract. Given the long-term nature of the related risks, this approach is appropriate to capture the uncertainty embedded in the underlying contracts, without adding the complexity of performing projections on an annual basis. The risk adjustment is further calculated at a coverage level in accordance with the related risk profile, and then aggregated up to profitability groups, cohorts, and portfolios. To determine the variability of the reserves, the risk margin approach was used.

With the risk margin approach, the risk adjustment is determined by calculating and combining explicit risk margins for non-financial risks as outlined in guidance provided by the Central Bank of Trinidad and Tobago and the Financial Services Commission of Jamaica, with reasonable adjustments applied by long-term insurers in the Dutch Caribbean as may be suitable for their territories. Quantification of the confidence level is done using a quantile technique based on an underlying normal probability distribution assumption for the future cash flows. The Group's weighted average confidence level corresponding to the results of this technique was 77% (2024: 77%). The confidence levels by territory were as follow: Trinidad and Tobago life insurance subsidiaries - 76% - 77% (2024: 75% - 76%), Jamaican life insurance subsidiary - 73% (2024: 76%), Dutch Caribbean life insurance subsidiaries - 79.9% - 80.3% (2024: 81.4%). Consideration of the amount of diversification benefit is done at the entity level reflecting the diversification in contracts sold across portfolios as this reflects the potential for risk reduction when the entity has a diversified portfolio of insurance contracts.

Expressed in Trinidad and Tobago Dollars

(Continued)

3. Critical accounting estimates and judgements in applying accounting policies (continued)

(a) Insurance contracts (continued)

Methods used to measure the risk adjustment for non-financial risk (continued)

For insurers in the Property and Casualty Segment, the risk adjustment was calculated on a one-year basis given the short-term nature of the contracts in this segment. These calculations are performed at a Line of Business level, which is effectively equivalent to a portfolio, summed for all territories. The risk adjustment is then allocated to the various territories on a basis proportional to the discounted present value of future cash flows. To determine the variability of the reserves for property and casualty contracts, the Group used the Overdispersed- Poisson (ODP) Bootstrap approach. The ODP Bootstrap approach is widely used in the Property & Casualty industry for estimating loss reserve variability. The Group used this approach to replicate the paid and incurred chain-ladder methods. The various portfolios were analysed using aggregated loss triangles up to a particular accident year that combined the various territories for which valuations are carried out. The confidence level range was 70% - 95% (2024: 70% - 95%).

The methods and assumptions used to determine the risk adjustment for non-financial risk were not changed in 2024 and 2025.

(b) Business model assessment

Classification and measurement of financial assets depend on the results of the SPPI and the business model test. The Group determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Group monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Group's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. Factors considered by the Group's business units in determining the business model for a group of assets are disclosed in Note 2.9(b).

(c) Fair valuation of financial assets

The fair value of financial assets that are not traded in an active market is determined by using an internally developed bond valuation model. Assumptions used in this model are validated and periodically reviewed internally by qualified personnel. Where applicable, data is calibrated to ensure that outputs reflect actual data and comparative market prices. Changes in assumptions used in valuations could affect reported fair value of financial assets. Key assumptions are based on current market yields. At 31 December 2025, the carrying amount of financial assets that were fair valued using an internally developed bond valuation model was \$13.5 billion (2024: \$12.0 billion).

3. Critical accounting estimates and judgements in applying accounting policies (continued)

(c) Fair valuation of financial assets (continued)

The following table shows the effect on the profit or loss and fair value reserve to changes in the market yields.

	Effect on fair value reserve		Effect on consolidated income	
	2025 \$'000	2024 \$'000	2025 \$'000	2024 \$'000
For the Trinidadian subsidiaries:				
1% increase in market yields	(42,335)	(39,277)	(12,041)	(12,708)
1% decrease in market yields	46,320	42,797	13,349	14,106
For the Jamaican subsidiaries:				
2% increase in market yields	(137,426)	(109,363)	(405,439)	(352,020)
2% decrease in market yields	163,258	123,984	536,470	418,828
For the Dutch Caribbean subsidiaries:				
1% increase in market yields	(210,590)	(106,568)	–	–
1% decrease in market yields	241,771	137,771	–	–

(d) Impairment losses on financial assets

The measurement of ECL allowance for financial assets measured at amortised cost and fair value through other comprehensive income requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's expected credit loss calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the expected credit loss models that are considered accounting judgements and estimates include:

- ▶ The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime expected credit loss basis and the qualitative assessment
- ▶ The segmentation of financial assets when their ECL is assessed on a collective basis
- ▶ Development of ECL models, including the various formulas and the choice of inputs
- ▶ Use of macroeconomic data for internal credit ratings and outlooks, to derive associated probabilities of default as prescribed by external rating agencies such as Standard & Poor's and Moody's
- ▶ Development of forward-looking scenarios probability weighted based on macroeconomic trends and expectations
- ▶ Determination of associations between macroeconomic scenarios and, economic inputs and the effect on probabilities of default, exposure at default and loss given default

The Group regularly reviews its internal models in the context of actual loss experience and adjusts when necessary.

Forward-looking macroeconomic variables

The estimation and application of forward-looking information requires significant judgement. PD, LGD and EAD inputs used to estimate Stage 1 and Stage 2 credit loss allowances are modelled based on the macroeconomic variables (or changes in macroeconomic variables) that are most closely correlated with credit losses in the relevant portfolio. The estimation of ECL on 12-month ECL and Lifetime ECL is a discounted probability-weighted estimate that considers three future macroeconomic scenarios, with macroeconomic projections varying by territory. The base case scenario assumes that a stable economic environment where current conditions, based on available macroeconomic data, will largely continue. Upside and downside scenarios are set relative to the base case scenario based on reasonably possible alternative macroeconomic conditions, considering both historical conditions and macroeconomic forecasts and trends.

Scenarios are reassessed on at least an annual basis and more frequently if conditions warrant. Scenarios are probability-weighted separately for each territory modelled according to the best estimate of their relative likelihood based on historical frequency and current trends and conditions. Probability weights are updated on an annual basis or more frequently as warranted.

The carrying amounts of expected credit loss allowance on financial assets as at 31 December 2024 and 2025 are disclosed in Note 4.2.3(e).

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

3. Critical accounting estimates and judgements in applying accounting policies (continued)

(e) Taxation

The Group is subject to income taxes in numerous jurisdictions. Estimates are required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

(f) Impairment of non-financial assets

An impairment exists when the carrying value of an asset or cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from approved budgets and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the cash-generating unit being tested. The recoverable amount is sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. The carrying amount of impairment provisions on non-financial assets as at 31 December 2025 was \$149.9 million (2024: \$123.0 million).

(g) Determining the lease term of contracts with extension and termination options – Group as lessee

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has several lease contracts that include extension and termination options. In determining the lease term, the Group considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. The Group considers factors such as penalties to terminate, historical lease durations and the costs and business disruption required to replace leased assets. Extension options in most office space leases have been included in the lease liability.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.

(h) Post-employment benefits

In conducting valuation exercises to measure the effect of all post-employment benefit plans throughout the Group, the Group's external actuaries use judgement and assumptions in determining discount rates, salary increases, pension increases and health care costs. These assumptions are detailed in Note 13 and Note 24.

4. Management of Insurance and Financial Risk

The Group issues contracts that transfer insurance risk or financial risk or both. This section summarises these risks and the way the Group manages them.

4.1 Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Group faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Group has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars
(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

Factors that aggravate insurance risk include lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered.

4.1.1 Property and Casualty insurance risks

(a) Exposures to risks and how they arise

Property

For property insurance contracts, climatic changes give rise to more frequent and severe extreme weather events (for example, flooding and hurricanes) and their consequences (for example, subsidence claims). The cost of rebuilding properties, of replacement or indemnity for contents and the time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies. The greatest likelihood of significant losses on these contracts arises from storm or flood damage.

Casualty

There are several variables that affect the risk arising from these contracts. These mainly relate to the inherent risks of the business activities carried out by individual contract holders and the risk management procedures they adopted. The compensation paid on these contracts is the monetary awards granted for bodily injury suffered by employees (for employer's liability cover) or members of the public (for public liability cover). Such awards are lump-sum payments that are calculated as the present value of the lost earnings and rehabilitation expenses that the injured party will incur as a result of the accident.

(b) Objectives, policies and processes for managing risks

Property

For certain contracts, the Group has also limited the number of claims that can be paid in any policy year or introduced a maximum amount payable for claims in any policy year. The Group also has the right to re-price the risk on renewal and the ability to impose deductibles and reject fraudulent claims. These contracts are underwritten by reference to the commercial replacement value of the properties and contents insured, and claims payment limits are always included to cap the amount payable on occurrence of the insured event. The Group analyses the property exposures using in-house and external modelling tools and purchases sufficient reinsurance protection to cover its perceived liabilities.

The Group's reinsurance arrangements include proportional quota share and surplus arrangements and non-proportional excess of loss placements on a per claimant and a per occurrence basis.

Property insurance risk concentration by product and geography is included in the tables below with reference to the carrying amount of the net insurance contract liabilities arising from these contracts.

	As at 31 December 2025			As at 31 December 2024		
	Business \$'000	Residential \$'000	Total \$'000	Business \$'000	Residential \$'000	Total \$'000

Casualty

Risk exposures for casualty insurance can be affected by several factors. The Group manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling.

The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk, industry and geography.

Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Group has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of a fraudulent claim. Insurance contracts also entitle the Group to pursue third parties for payment of some or all costs (subrogation).

The Group's reinsurance arrangements include non-proportional excess of loss placements on a per claimant and a per occurrence basis.

(c) Methods used to measure risks

Property

Property claims are analysed separately for subsidence and non-subsidence claims. The development of large losses/catastrophes is analysed separately. Non-subsidence claims can be estimated with greater reliability, and the Group's estimation processes reflect all the factors that influence the amount and timing of cash flows from these contracts. The shorter settlement period for these claims allows the Group to achieve a higher degree of certainty about the estimated cost of claims and relatively little claims are expected to have occurred without being reported at year end. The longer time needed to assess the emergence of a subsidence claim makes the estimation process more uncertain.

Casualty

The Group is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time and a large element of the claims provision relates to claims incurred but not reported.

The estimated cost of claims includes direct expenses to be incurred in settling claims. The Group takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established. The liability for these contracts comprises a liability for incurred claims, consisting of probability weighted discounted cash flows and a risk adjustment, and a liability for remaining coverage, consisting of the unearned premiums received less acquisition costs.

In calculating the liability, the Group's estimation techniques are a combination of loss-ratio-based estimates (where the loss ratio is defined as the ratio between the ultimate cost of insurance claims and insurance premiums earned in a particular financial year in relation to such claims) and an estimate based upon actual claims experience using predetermined formulae where greater weight is given to actual claims experience as time passes.

The initial loss-ratio estimate is an important assumption in the estimation technique and is based on previous years' experience, adjusted for factors such as premium rate changes, anticipated market experience and historical claims inflation.

In estimating the liability for incurred claims, the Group considers any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio. The portion of the liability for incurred claims that have not yet been reported is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Group, where information about the claim event is available. These claims may not be apparent to the insurer until many years after the event that gave rise to the claims has happened.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

4.1.1 Property and Casualty insurance risks (continued)

(c) Methods used to measure risks (continued)

Casualty (continued)

Where possible, the Group adopts multiple techniques to estimate the required level of provisions. This provides a greater understanding of the trends inherent in the experience being projected. The projections given by the various methodologies also assist in estimating the range of possible outcomes. The most appropriate estimation technique is selected taking into account the characteristics of the business class and the extent of the development of each accident year.

Note 15.12 presents the development of the estimate of ultimate claim cost for claims notified in a given year. This gives an indication of the accuracy of the Group's estimation technique for claims payments.

(d) Changes in assumptions

The Group's assumptions in respect of property and casualty insurance contracts have not significantly changed from the prior year.

(e) Sensitivity analysis

The following table presents information on how reasonably possible changes in assumptions made by the group with regard to underwriting risk variables impact profit or loss and equity before and after risk mitigation by reinsurance contracts held. These contracts are measured under the PAA, and thus, only the LIC component of insurance liabilities is sensitive to possible changes in underwriting risk variables.

	2025				2024			
	Property		Casualty		Property		Casualty	
	Profit or loss impact \$'000	Equity impact \$'000	Profit or loss impact \$'000	Equity impact \$'000	Profit or loss impact \$'000	Equity impact \$'000	Profit or loss impact \$'000	Equity impact \$'000
Worsening of unpaid claims and expenses - 5% increase								
Net insurance contract liabilities	(51,505)	(36,097)	(22,594)	(16,754)	(20,111)	(15,024)	(29,712)	(23,768)
Net reinsurance contract assets	37,047	24,969	11,840	8,941	13,262	9,532	15,894	13,175

4.1.2 Short-term group life and health contracts

(a) Exposures to risks and how they arise

Short-duration life insurance contracts are contracts that are typically of a short tenure. These contracts are mainly issued to employers to insure their commitments to their employees. The risk is affected by the nature of the industry in which the employer operates. The risk of death and disability will vary by industry.

(b) Objectives, policies and processes for managing risks

The Group attempts to manage this risk through its underwriting and claims handling. Additionally, there is reinsurance on short-duration life insurance contracts.

Short-duration life insurance risk concentration by geography is included in the tables below with reference to the carrying amount of the net insurance contract liabilities arising from these contracts.

	2025 \$'000	2024 \$'000
Trinidad & Tobago	32,866	35,034
Jamaica	63,240	72,874
Dutch Caribbean	27,933	29,504
Other territories	(1,164)	26,748
	<u>122,875</u>	<u>164,160</u>

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

4.1.2 Short-term Group life and Health contracts (continued)

(c) Methods used to measure risks

There is no need to estimate mortality rates or morbidity rates for future years because these contracts have short duration. However, for incurred disability income claims, it is necessary to estimate the rates of recovery from disability for future years. The Group currently does so using conservative assumptions.

(d) Changes in assumptions

The Group's assumptions in respect of short duration life insurance contracts have not significantly changed from the prior year.

(e) Sensitivity analysis

The following table presents information on how reasonably possible changes in assumptions made by the Group with regard to underwriting risk variables impact profit or loss and equity before and after risk mitigation by reinsurance contracts held. These contracts are measured under the PAA, and thus, only the LIC component of insurance liabilities is sensitive to possible changes in underwriting risk variables.

	2025		2024	
	Profit or loss impact \$'000	Equity impact \$'000	Profit or loss impact \$'000	Equity impact \$'000
Worsening of unpaid claims and expenses - 5% increase				
- Net insurance contract liabilities	(2,601)	(2,055)	(3,761)	(3,043)
- Net reinsurance contract assets	3,269	2,754	2,511	2,094

4.1.3 Long-term insurance contracts

(a) Exposures to risks and how they arise

For contracts where death is the insured risk, the most significant factors that could increase the overall frequency of claims are epidemics or widespread changes in lifestyle, such as in eating, smoking and exercise habits, resulting in earlier or more claims than expected. For contracts where survival is the insured risk, the most significant factor is continued improvement in medical science and social conditions that would increase longevity.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

4.1.3 Long-term insurance contracts (continued)

(b) Objectives, policies and processes for managing risks

At present, these risks do not vary significantly in relation to the location of the risk insured by the Group. However, undue concentration could have an impact on the severity of benefit payments on a portfolio basis.

For contracts with fixed and guaranteed terms, there are no mitigating terms and conditions that reduce the insurance risk accepted. For contracts without fixed terms, a significant portion of the insurance risk is shared with the insured party. The Group charges for mortality risk on a monthly basis for most life and critical insurance contracts without fixed terms. It has the right to alter these charges based on its mortality experience and hence minimise its exposure to mortality risk.

The Group manages these risks through its underwriting strategy and reinsurance arrangements. Medical selection is included in the Group's underwriting procedures with premiums varied to reflect the health condition and family medical history of the applicants. The Group uses excess of loss reinsurance contracts with retention limits that vary by product.

The table below presents the concentration of insured benefits across five bands per individual life assured. The benefit insured figures are shown gross and net of the reinsurance contracts described above. These tables do not include annuity contracts, for which a separate analysis is reported further below.

For the Trinidadian life insurance subsidiaries:

Benefits assured per life \$'000	2025 - Total benefits insured			
	Before reinsurance		After reinsurance	
	TT\$'000	%	TT\$'000	%
0 - 250 (TT\$)	21,196,922	21.2%	20,848,339	25.0%
251 - 500 (TT\$)	28,371,765	28.4%	25,858,864	31.1%
501 - 1,000 (TT\$)	26,792,851	26.8%	22,295,408	26.8%
1,001 - 3,000 (TT\$)	16,777,801	16.8%	12,148,610	14.6%
3,001 and over (TT\$)	6,911,244	6.8%	2,122,721	2.5%
Total	100,050,583	100.0%	83,273,942	100.0%

The risk is concentrated in the lower value bands. This has not changed from last year.

Benefits assured per life \$'000	2024 - Total benefits insured			
	Before reinsurance		After reinsurance	
	TT\$'000	%	TT\$'000	%

1,001 - 1,500 (XCG)	390,079	3.1%	232,951	2.1%
1,501 - 2,000 (XCG)	169,201	1.4%	83,291	0.7%
More than 2,000 (XCG)	130,134	1.0%	72,046	0.6%
Total	12,469,345	100.0%	11,353,385	100.0%

The following tables for annuity insurance contracts illustrate the concentration of risk based on five bands that group these contracts in relation to the amount payable per annum, as if the annuity were in payment at the year end. The Group does not hold any reinsurance contracts against the liabilities carried for these contracts.

Insurance risk for contracts disclosed in this note is also affected by the contract holders' right to pay reduced or no future premiums, to terminate the contract completely, or to exercise a guaranteed annuity option. As a result, the amount of insurance risk is also subject to contract holder behaviour.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars
(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

4.1.3 Long-term insurance contracts (continued)

(b) Objectives, policies and processes for managing risks (continued)

For the Trinidadian life insurance subsidiaries:

	Total annuities payable per annum			
	2025		2024	
	TT\$'000	%	TT\$'000	%
Annuity payable per annum per life				
0 - 5,000 (TT\$)	7,205	3.1%	7,228	3.3%
5,001 - 10,000 (TT\$)	31,038	13.4%	29,629	13.4%
10,001 - 20,000 (TT\$)	55,252	23.8%	52,487	23.8%
More than 20,000 (TT\$)	138,749	59.7%	131,590	59.5%
Total	232,244	100.0%	220,934	100.0%

The greatest concentration remains at the highest band, which is consistent with the prior year.

For the Jamaican life insurance subsidiary:

	Total annuities payable per annum			
	2025		2024	
	TT\$'000	%	TT\$'000	%
Annuity payable per annum per life				
0 - 200,000 (J\$)	21,233	11.5%	21,419	12.6%
200,001 - 300,000 (J\$)	10,919	5.9%	10,842	6.4%
300,001 - 400,000 (J\$)	11,561	6.3%	10,949	6.4%
400,001 - 500,000 (J\$)	9,451	5.1%	8,473	5.0%
More than 500,000 (J\$)	130,838	71.2%	118,381	69.6%
Total	184,002	100.0%	170,064	100.0%

The greatest risk concentration remains at the highest band and lowest band, which is consistent with the prior year.

For the Dutch Caribbean life insurance subsidiaries:

	Total annuities payable per annum			
	2025		2024	
	TT\$'000	%	TT\$'000	%
Annuity payable per annum per life				
0 - 10,000 (XCG)	42,260	30.9%	41,129	30.9%
10,001 - 20,000 (XCG)	29,972	21.9%	29,466	22.2%
20,001 - 30,000 (XCG)	18,481	13.5%	18,531	13.9%
30,001 - 40,000 (XCG)	10,594	7.7%	10,208	7.7%
40,001 - 50,000 (XCG)	8,832	6.5%	8,463	6.4%
More than 50,000 (XCG)	26,704	19.5%	25,105	18.9%
Total	136,843	100.0%	132,902	100.0%

The risk is spread over all bands, which is consistent with the prior year.

(c) Methods used to measure risks

For long-term insurance contracts, the Group determines assumptions in relation to future deaths and other benefits, voluntary termination, investment returns, administrative expenses and other items that are appropriate to the policies, their location and the local statutory reserving requirements.

The nature and method of determining the significant assumptions made by the Group in the computation of policyholders' liabilities are described in the following paragraphs.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.1 Insurance risk (continued)

4.1.3 Long-term insurance contracts (continued)

(c) Methods used to measure risks (continued)

● Mortality & morbidity

An appropriate base table of standard mortality or morbidity is chosen depending on the type of contract. Supplemental information, such as reinsurance rates, is used where standard tables are not available. An investigation into the Group's experience in recent years is performed, and the standard actuarial tables are adjusted where appropriate to reflect the Group's own experience or expectations. For contracts that insure the risk of longevity, appropriate but not excessively prudent allowance is made for expected mortality improvements.

Assumptions and methods used to derive mortality and morbidity assumptions did not change during the year. The following assumptions were used:

Gender	Smoker Status	Mortality Table	Percentage of table	
			2025	2024
For the Trinidadian life insurance subsidiaries:				
Male	Non-smoker	CIA9704	80% - 280%	100% - 141%
Male	Smoker	CIA9704	80% - 280%	100% - 141%
Female	Non-smoker	CIA9704	80% - 280%	100% - 141%
Female	Smoker	CIA9704	80% - 280%	100% - 141%
For the Jamaican life insurance subsidiary:				
Male	Non-smoker	CIA9704	57% - 246%	67% - 267%
Male	Smoker	CIA9704	28% - 172%	33% - 173%
Female	Non-smoker	CIA9704	80% - 248%	84% - 273%
Female	Smoker	CIA9704	27% - 112%	31% - 200%
For the Dutch Caribbean life insurance subsidiaries:				
Male	Non-smoker	NISTT2021/GBM/V0510	1%	1%
Male	Smoker	NISTT2021/GBM/V0510	1%	1%
Female	Non-smoker	NISTT2021/GBM/V0510	1%	1%
Female	Smoker	NISTT2021/GBM/V0510	1%	1%

A possible increase in mortality rates increases estimates of future cash outflows and thus decreases the CSM. For a sensitivity analysis, refer to Note 4.1 (d).

● Terminations

Estimates of the amounts and timings of future benefit and premium payments are based on Group experience over extended periods. Terminations (lapses and surrenders) and variable premium assumptions vary by product type and policy duration.

● Policy maintenance expense and inflation

Amounts are included in policyholders' liabilities to provide for the future costs of administering policies in force. Expenses comprise expenses directly attributable to the groups of contracts including an allocation of fixed and variable overheads. The expense base is determined from a review of current, recent and expected Group expense levels and allowance is made for future expense inflation.

Inflation rates are sourced from various international and regional economic journals and reports. These inflation rates assumed are summarised in the following table.

	2025	2024
Trinidad and Tobago	2.0%	2.0%
Jamaica	4.0% - 4.5%	4.0% - 4.5%
Dutch Caribbean	1.0%	1.0%

● Tax

It has been assumed that current tax legislation and rates for long-term insurance companies continue unaltered.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars
(Continued)

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk

The Group is exposed to financial risk through its financial assets, financial liabilities (investment contracts and borrowings), reinsurance assets and insurance liabilities. In particular, the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance and investment contracts. The components of this financial risk are interest rate risk, equity price risk, foreign currency risk, liquidity risk and credit risk. These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements.

Risk management is carried out by Executive Investment Committees and Risk Management departments, with direct support from the Actuarial departments, as well as the respective business units. It is conducted in accordance with policies and frameworks approved by the Group's Board of Directors, ensuring alignment with the organisation's risk appetite, governance standards, and strategic objectives. The Group identifies, evaluates and manages financial risks in close co-operation with the Group's operating units. The Board provides principles for overall risk management as well as policies covering specific areas such as foreign exchange risk, interest rate risk, credit risk and investment of excess liquidity.

4.2.1 Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk - currency risk, interest rate risk and other price risk, each of which is considered below.

(a) Currency risk

The Group takes on exposure to effects of fluctuations in the prevailing foreign currency rates on its financial position and cash flows. The Group's main operations are in the Caribbean and in the Netherlands. The main exposure to risks are in respect to the US dollar, Caribbean guilder, Jamaican dollar and the Euro. The Group's strategy for dealing with foreign exchange risk is to offset, as far as possible, foreign currency liabilities with assets denominated in the same currency.

Each subsidiary has an Executive Investment Committee, which has oversight for the management of currency risk. The Trinidad and Tobago insurance subsidiaries' exposure to currency risk is also mitigated by the requirements of the Insurance Act 2018, which does not allow more than 30% of the assets supporting policyholder liabilities to be held in currencies other than the currency of the liability. In addition, the Group also has an Asset and Liability Committee which oversees and manages consolidated currency risk and exposures.

The tables below summarises the Group's exposure to foreign currency exchange rate risk as at 31 December. The Group's assets and liabilities at carrying amounts are included in the table categorised by currency positions expressed in TT\$ equivalents.

	TT TT\$'000	US TT\$'000	XCG TT\$'000	JMD TT\$'000	Euro TT\$'000	Other TT\$'000	Total TT\$'000

2024	21,331	9,600	(67,169)	31,486	8,373	3,621

The following table presents analysis of how a possible shift in market currency exchange rates might impact the insurance contract liability balances and the respective underlying assets, as well as the net impact on profit or loss and equity. Transactions or balances not within the scope of IFRS 17 are not subject to currency risk.

	US TT\$'000	XCG TT\$'000	JMD TT\$'000	Euro TT\$'000	Other TT\$'000	Total TT\$'000
For the year 2025:						
Impact on statement of income						
- Insurance and reinsurance contracts	13,964	-	-	(613)	(1,084)	12,267
- Underlying investment assets	(3,441)	-	-	429	(1,284)	(4,296)
- Net impact	10,523	-	-	(184)	(2,368)	7,971
Impact on net equity						
- Insurance and reinsurance contracts	13,855	39,923	(104,052)	(5,164)	(10,123)	(65,561)
- Underlying investment assets	(15,330)	(47,583)	93,575	5,440	10,290	46,392
- Net impact	(1,475)	(7,660)	(10,477)	276	167	(19,169)
For the year 2024:						
Impact on statement of income						
- Insurance and reinsurance contracts	(6,248)	-	-	(5,166)	965	(10,449)
- Underlying investment assets	3,446	-	-	516	-	3,962
- Net impact	(2,802)	-	-	(4,650)	965	(6,487)
Impact on net equity						
- Insurance and reinsurance contracts	(6,238)	(63,052)	85,330	(4,594)	(7,242)	4,204
- Underlying investment assets	21,035	68,207	(77,676)	4,679	11,199	27,444
- Net impact	14,797	5,155	7,654	85	3,957	31,648

Underlying assets are those assets that are either contractually linked to the relevant insurance contracts or they are specifically used to back insurance contracts.

The analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions might be correlated. No changes were made by the Group in the methods and assumptions used in preparing the above analysis.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.1 Market risk (continued)

(b) Interest rate risk

The Group is exposed to various risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The major element of interest rate risk within the Group is the risk that the interest earned on the Group's investments is insufficient to meet the interest rates credited or guaranteed to policyholders. This applies to traditional life insurance policies and the deposit administration plans.

Exposure is managed largely by the use of natural hedges that arise by matching interest-sensitive assets with liabilities of a similar nature. The Group also mitigates the effect of interest rate risk of the investment portfolio through the functioning of subsidiary Executive Investment Committees and the pricing of products by the actuarial function. The investment portfolio return is continually monitored by the Investment Committees. The results of these reviews inform the pricing of products and interest rates to be credited to the respective policies and plans. In addition, the Group also has an Asset and Liability Committee which oversees and manages consolidated interest rate risk and exposures.

The following table presents analysis of how a possible shift in market interest rates might impact the balances of contracts within the scope of IFRS 17 and investment assets, as well as the net impact on profit or loss and equity. Insurance and reinsurance contracts measured under the GMM are moderately sensitive to changes in market interest rates due to the discounting of the future expected cash flows. Insurance contracts measured under the VFA are highly sensitive to changes in market interest rates due both to the discounting of the future expected cash flows, but also due to the impact on the expected performance of the underlying assets. The Group's other financial assets and liabilities are not significantly sensitive to interest rates. For the sensitivity analysis, a 2% movement in interest rates was used for 2025 for the Jamaican market (2024 - 2%), a 1% movement was used for 2025 for the Trinidadian, Dutch Caribbean and Other markets (2024 - 1%). The following table shows the estimated effect of an increase or decrease in the above rates on the profit or loss and equity.

	2025				2024

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.1 Market risk (continued)

(c) Other price risk

Price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market. The Group is exposed to equity securities price risk because of investments held by the Group and classified on the consolidated statement of financial position as fair value through profit or loss. The Group manages its price risk by limiting the amount of its investments in equities and by monitoring movements in equity prices.

The sensitivity analysis for equity price risk illustrates how changes in the fair value of equity securities will fluctuate because of changes in market prices at the reporting date.

The following table presents analysis of how a possible shift in market equity prices might impact insurance contract balances and financial assets held by the Group, as well as the net impact on profit or loss and equity.

	2025				
	Profit or loss			Equity	
	Change in Equity prices	Net insurance contract liability	Investment securities	Net insurance contract liability	Investment securities
		\$'000	\$'000	\$'000	\$'000

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.2 Liquidity risk

Liquidity risk is the risk that cash may not be available to pay obligations when due, at a reasonable cost. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities, and the ability to close out market positions.

Certain of the Group's contracts have features that allow them to be terminated at short notice creating a potential liquidity exposure. The Group monitors liquidity on a regular basis. For each significant subsidiary an internally constituted Executive Investment Committees set limits on the minimum proportion of maturing funds available to meet such calls and on the minimum level of borrowing facilities that should be in place to cover claims. In addition, the Group also has an Asset and Liability Committee which oversees and manages consolidated liquidity risk and exposures.

There are no individual contracts or policyholders who have the potential to influence the withdrawal of a significant amount of liabilities.

The following tables analyse the insurance and financial liabilities of the Group into relevant maturity groupings based on the remaining period to the contractual or expected maturity date, alongside the remaining contractual maturities of the Group's financial assets. Financial liabilities are at contractual undiscounted cash flows and investment contracts are at expected undiscounted cash flows. Insurance contract liabilities include both actual and expected contractual undiscounted cash flows as they relate to both the LRC and the LIC.

Property and casualty contracts issued, short-term group life and health contracts issued, and reinsurance contracts held have zero amounts payable on demand.

For insurance contracts issued that are traditional life and interest sensitive without guarantees, as well as annuities, the amount payable on demand represents the policyholders' cash surrender values less applicable surrender fees. For insurance contracts that are unit-linked and interest sensitive with guarantees, the amount payable on demand represents the policyholders' fund balances, plus cash surrender values, if any, less applicable surrender fees.

Expressed in Trinidad and Tobago Dollars

(Continued)

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.3 Credit risk

Credit risk is defined as the potential for loss that can occur as a result of an individual, counterparty or issuer being unable or unwilling to honour its contractual obligations to the Group. Each subsidiary in the various jurisdictions has an Executive Investment Committee (EIC) that sets credit limits and monitors exposure by constraining the magnitude and tenor of the exposure to counterparties and issuers. Some of the credit risk mitigation techniques include, where appropriate, the right to require initial collateral or margin, the right to terminate transactions, and the right to obtain collateral (including guarantees) should unfavourable events occur. In addition, the Group also has an Asset and Liability Committee which oversees and manages consolidated credit risk and exposures.

Collateral held as security for mortgage loans and other loans includes physical or tangible residential and commercial edifices as well as legal rights to insurance portfolio and other assets of the respective borrowers. The EIC initiates regular portfolio reviews, monitors counterparty creditworthiness and evaluates potential transaction risks with a view towards early problem identification and protection against unacceptable credit-related losses.

(a) Credit risk management and exposures for insurance and reinsurance assets

The Group has significant credit risk arising from reinsurance contracts held. Credit risk associated with future premium inflows from insurance contracts issued is mitigated by the Group's ability to terminate insurance contract services when policyholders fail to meet their premium payment obligations.

The Group structures the levels of credit risk arising from ceded reinsurance by incorporating limits into its reinsurance treaties on the maximum size of policy and maximum amount of benefits that can be provided per insured life. The Group does not seek to manage its credit risk via other characteristics such as limiting exposure to a single counterparty or groups of counterparties, given the relative size of the Group to its reinsurers.

Reinsurance is used to manage insurance risk. This does not, however, discharge the Group's liability as the primary insurer. If a reinsurer fails to pay a claim for any reason, the Group remains liable for the payment to the policyholder.

The Group actively monitors the financial status of its reinsurers both by reference to publicly available information and the Financial Strength Ratings of A.M. Best. All of the Group's reinsurers are rated superior by A.M. Best. A rating of superior is assigned to reinsurance companies that have, in the opinion of A.M. Best, a superior ability to meet their ongoing obligations to the primary insurer.

(b) Assets bearing credit risk

Below is an analysis of assets bearing credit risk.

	Gross exposure		Net carrying amount

4.2 Financial risk (continued)

4.2.3 Credit risk (continued)

(c) Credit quality of reinsurance and financial assets

The credit quality of financial assets can be assessed by reference to external credit ratings, if available, or to a rating assigned by the investment manager using an approach consistent with that used by Standard and Poor's.

AAA

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Below BBB

Obligations rated 'Below BBB' are regarded as having significant speculative characteristics. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

Not Rated

This indicates that there is insufficient information on which to base a rating. These balances are current and are monitored regularly for impairment. This classification mainly includes obligations due from individuals and short-term securities.

The following tables set out the credit quality analysis for financial assets measured at amortised cost and fair value through other comprehensive income.

(e) Loss allowance

The following tables show reconciliations from the opening to the closing balance of the loss allowance by class of financial asset. Reconciling items include the following:

- ▶ New assets originated or purchased, which reflect the allowance related to assets newly recognized during the period.
- ▶ Assets derecognised, which reflect the allowance related to assets derecognized during the period without a credit loss being incurred, including those assets that were derecognized following a modification of terms.
- ▶ Net transfer to/(from) 12-month ECL and lifetime ECL, which are presumed to occur before any corresponding remeasurement of the allowance.
- ▶ Remeasurements, which comprise the impact of changes in model inputs or assumptions, including changes in forward-looking macroeconomic conditions; changes in the measurement following a transfer between 12-month ECL and lifetime ECL; unwinding of the time value discount due to the passage of time; and changes in probabilities of default and losses given default. For the year ended 31 December 2025, the Group made further refinements of its recently updated ECL model, including the introduction of the Vasicek formula along with a modification in the approach to incorporating forward-looking assumptions, the use of new data tables from Moody's, and expanded use of interpolation. The impact of this change is also included in this line.

Cash and cash equivalents

Impairment on cash and cash equivalents measured at amortised cost has been measured on the 12-month expected loss basis and reflects the short maturities of the exposures. The Group uses a similar approach for the assessment of expected credit losses for cash and cash equivalents to those used for debt securities.

The impairment allowance on cash and cash equivalents as at 31 December 2025 is \$12,666,000 (2024: \$11,511,000). The Group recognised a net impairment gain of \$8,056,000 for the year ended 31 December 2025 (2024: \$663,000 impairment gain).

Credit Risk - Economic Variable Assumptions

The most significant period-end assumptions used for the ECL estimate as at 31 December 2025 and 2024 are set out below.

The PDs and LGDs are impacted by long-term changes in the various data sets gathered from external rating agencies such as Moody's. In 2025, the Group made refinements to its ECL model, including the introduction of the Vasicek formula and its associated Economic Cycle Factors (or Z-scores). The Z-score is a measure of the state of economy and considers macroeconomic variables used in the Group's ECL models such as real gross domestic product growth, debt to GDP ratios, and unemployment for the various territories. A Z-score of -1.0 indicates an economy in recession, a Z-score of +1.0 indicates a strong economy, and a Z-score of 0 indicates a neutral economy.

To calculate an appropriate Z-score for each territory, three economic scenarios were developed. Refer to Note 3(d) for descriptions of the scenarios. Refer to the table below for the probabilities applied to each scenario and the resulting Z-score achieved (except for 2024 when Z-scores were not yet in use).

Scenario	2025 Assumptions			Resulting Z-Score	2024 Assumptions			Resulting Z-Score
	Best Case	Worst Case	Base Case		Best Case	Worst Case	Base Case	
Trinidad & Tobago	0%	10%	90%	-0.137	15%	20%	65%	N/A
Jamaica	20%	10%	70%	0.488	35%	10%	55%	N/A
Dutch Caribbean	30%	10%	60%	0.224	10%	25%	65%	N/A
United States	0%	5%	95%	-0.235	10%	15%	75%	N/A
Other Caribbean	20%	0%	80%	0.203	10%	15%	75%	N/A

Credit Risk - Sensitivity analysis

Set out below are the changes in ECL allowance at the reporting date that would result from a reasonably possible change in the PDs or the underlying Z-scores used by the Group.

(g) Concentrations of risks of reinsurance and financial assets with credit risk exposure

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry.

The following table breaks down the Group's main credit risk exposure as categorised by the industry sectors of its counterparties.

	2025 \$'000	2024 \$'000

4. Management of Insurance and Financial Risk (continued)

4.2 Financial risk (continued)

4.2.4 Capital management

The Group's principal capital resources include share capital, reserves, retained earnings and borrowings.

The Group's objectives when managing capital are:

- To comply with the capital requirements required by the regulators of the markets where the Group operates;
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To provide an adequate return to shareholders by pricing insurance and investment contracts commensurately with the level of risk.

In each country in which the Group operates, the local insurance regulator indicates the required minimum amount and type of capital that must be held by each of the subsidiaries in addition to their insurance liabilities. The Group is also subject to insurance solvency regulations in all the territories in which it issues insurance and investment contracts. The minimum required capital must be maintained at all times throughout the year. The Group monitors these requirements throughout the year to ensure compliance.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 December 2025.

The table below summarises the minimum required capital across the main territories in the Group. The Group has complied with these minimum capital requirements. These figures are an aggregate number, being the sum of the statutory capital and surplus for each insurance subsidiary in each country subject to local regulatory requirements (current or prospective), which may differ from jurisdiction to jurisdiction.

The Trinidadian trust services subsidiary holds a license under the Financial Institutions Act 2008 and is registered under the Securities Industry Act 2012. Under the Financial Institutions Act, the subsidiary is required to have a minimum paid up share capital of \$15 million and to transfer a minimum of 10% of its profit after tax to a Statutory Reserve Fund until the balance in the Fund is not less than the paid up capital of the subsidiary as well as the subsidiary's regulatory capital shall be no less than 10% of its risk weighted assets. Under the Securities Industry Act 2012, the subsidiary is required to have minimum capital of \$6 million, of which at least \$3 million shall be regulatory capital. The subsidiary has complied with these requirements.

The Trinidadian asset management subsidiary is registered under the Securities Industry Act 2012, and as such, the subsidiary is required to have a minimum capital of \$6 million, of which at least \$3 million shall be regulatory capital. The subsidiary has complied with this requirement.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars
(Continued)

5. Property, plant and equipment (continued)

The following are the dates of the last valuation of properties in the Group:

Guardian Life of the Caribbean Limited	-	September 2025
Bancassurance Caribbean Limited	-	August 2025
Guardian Life Limited	-	September 2025
Guardian General Insurance Limited	-	September 2025
Guardian Shared Services Limited	-	September 2025
Fatum Life N.V.	-	September 2025

Valuations were made on the basis of open market value by external independent appraisers, who are accredited in the territory that they serve. Valuations are based on active market prices, adjusted for any difference in the nature, location or condition of the specific property.

If freehold and leasehold properties were stated on a historical cost basis, the amounts would be as follows:

	2025 \$'000	2024 \$'000
Cost	460,567	452,254
Accumulated depreciation	(225,192)	(236,629)
Net book value	235,375	215,625

6. Leases

The following tables provide information for leases where the Group is a lessee.

(a) Right-of-use assets

The Group has both commercial and residential investment properties in the following territories: Jamaica, Barbados, Trinidad and Tobago, Grenada and Martinique.

Valuations are conducted annually by external valuers. All valuers are accredited in the territory that they serve, specializing in the valuation of commercial, residential and mixed use properties.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars
(Continued)

7. Investment properties (continued)

Residential properties are mainly revalued using the comparable sales approach, which estimates the fair value based on sale prices of properties of similar nature or in similar locations with price adjustments being made for any notable differences between the sample and subject properties such as location, size, and quality of improvements.

Commercial properties are primarily valued using the income and sales comparison approach, the direct capitalisation of income approach, or the profit tests or accounts approach. The income and sales comparison approach involves determining the value of the properties by applying an appropriate valuation model to convert the expected future cash flows into present values. Both the direct capitalisation of income and profit tests or accounts approach apply a valuation model that converts monthly rental income and expenses into market values through the use of a capitalisation rate. Refer to Note 38 for further information on these key unobservable inputs.

For some properties, various approaches were considered, including the income approach, the comparison approach, and the cost approach. No one approach was selected to determine the final valuation, instead a reasonable conclusion was drawn from the range of valuations determined.

No investment property in the Group is subject to any liens or mortgages and the Group has no restrictions with regard to the transfer, resale or other use of its investment properties. The Group is not under any contractual obligation with regard to significant development, enhancement, repair or maintenance of any investment properties.

Future minimum lease payments receivable on leases of investment properties are as follows:

	2025 \$'000	2024 \$'000
Within one year	35,967	29,929
Between one and two years	23,807	21,548
Between two and three years	22,205	19,140

Other intangible assets represent brand costs, computer software costs and website development costs.

Goodwill

Goodwill is assigned to the Group's cash-generating units on acquisition. In accordance with IFRS 3 Business Combinations, all assets that gave rise to goodwill were reviewed for impairment at year end using the higher of the value-in-use method and the fair value method. In each case, the cash flow projections were based on financial budgets for a three-year period, approved by senior management, with a growth assumption applied for later years.

A summary of the goodwill for each cash-generating unit is presented below:

	2025 \$'000	2024 \$'000
Guardian General Insurance Limited	97,459	97,459
Guardian Insurance Limited	153,977	153,977
Guardian General Insurance Jamaica Limited	6,244	6,584
Vanguard Risk Solutions Limited	68,755	68,722
Royal & Sun Alliance Insurance (Antilles) N.V.	26,809	26,718
Fatum Brokers Holding B.V.	57,243	57,990
	<u>410,487</u>	<u>411,450</u>

The key assumptions used for value-in-use calculations are as follows:

Cash generating unit	Discount Rate		Growth Rate	
	2025	2024	2025	2024
Guardian General Insurance Limited	9.9%	8.0%	2.9%	6.9%
Guardian Insurance Limited (Trinidad and Tobago based subsidiaries)	10.1%	8.0%	5.6%	4.5%
Guardian Insurance Limited (Jamaica based subsidiary)	10.2%	12.9%	7.7%	4.9%
Guardian General Insurance Jamaica Limited	9.9%	12.7%	3.8%	5.0%
Vanguard Risk Solutions Limited	9.9%	8.0%	8.9%	8.6%
Royal & Sun Alliance Insurance (Antilles) N.V.	11.2%	11.5%	2.0%	2.0%
Fatum Brokers Holding B.V.	11.9% - 12.2%	12.1% - 12.6%	2.0%	2.0%

The recoverable amount for Guardian General Insurance Limited and Guardian General Insurance Jamaica Limited exceeds their carrying value by \$21,704,000 (2024: \$19,447,000) and \$31,644,000 (2024: breakeven) respectively. A 1.1% increase in the discount rate or a 2% decrease in the growth rate would result in the recoverable amount being equal to their carrying amounts. For all other cash generating units, a reasonably possible change in key assumptions would not result in the carrying amount exceeding the recoverable amount.

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars
(Continued)

8. Intangible assets (continued)

Goodwill (continued)

Discount rates: Discount rates represent the current market assessment of the risks specific to each cash-generating unit, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Group and its operating segments and is derived from its weighted average cost of capital (WACC).

Growth rates: Rates are based on published industry research and management's expected performance of each cash-generating unit.

Based on the results of the above review, no impairment expense was required for goodwill.

The loss allowance on investment securities measured at fair value through other comprehensive income is recognised against other comprehensive income and accumulated in the fair value reserve. The total loss allowance accumulated in fair value reserve is \$18,127,000 (2024: \$12,574,000).

The carrying amount of investment securities that were pledged as collateral for liabilities was \$221,255,000 (2024: \$270,642,000).

Investment securities are pledged as collateral primarily as part of sales and repurchases and securities borrowing transactions under terms that are usual and customary for such activities. In addition, as part of these transactions, the Group has received collateral that it is permitted to resell or repledge in the absence of default.

As at 31 December 2025, the fair value of investment securities accepted as collateral that the Group is permitted to sell or repledge in the absence of default was \$120,477,000 (2024: \$59,561,000). No securities were sold or repledged during the year.

10. Investment securities (continued)**Derivative financial instrument**

The table below shows the fair value of the derivative financial instrument, which is recorded as an asset, together with its notional amount. The notional amount, recorded gross, is the quantity of the derivative contract's underlying instrument (being an equity index). The notional amounts indicate the volume of transactions outstanding at the year end and are not indicative of the market risk.

	2025		2024	
	Carrying Value \$'000	Notional Amount \$'000	Carrying Value \$'000	Notional Amount \$'000
Derivative held for trading - equity option	82,677	66,589	66,362	63,201

Options are contractual agreements that convey the right, but not the obligation, for the purchaser either to buy or sell a specified amount of a financial instrument at a fixed price, either at a fixed future date or at any time within a specified period.

The Group purchased an option in an over-the-counter transaction. The option provides the Group with the opportunity to purchase (call option) the underlying asset at an agreed value at the expiration of the option. The Group is exposed to credit risk on the purchased option only to the extent of its carrying amount, which is its fair value.

11. Loans and receivables	2025 \$'000	2024 \$'000
Mortgage loans	1,015,298	894,606
Commercial and other loans	1,046,649	959,527
Fronting contracts and insurance brokerage receivables	556,471	302,896
Interest receivable	8,150	10,210
Other receivables	414,157	365,836
Loss allowance	(219,797)	(183,018)
	<u>2,820,928</u>	<u>2,350,057</u>
Current	911,409	621,920
Non-current	<u>1,909,519</u>	<u>1,728,137</u>
	<u>2,820,928</u>	<u>2,350,057</u>

The carrying amounts of loans and receivables are reasonable approximations of their fair values. There were no loans and receivables pledged as collateral for liabilities at year end (2024: nil).

12. Properties for development and sale	2025 \$'000	2024 \$'000
Pointe Simon (Note 7)	95,941	78,729

12. Properties for development and sale (continued)

Properties for development and sale comprise the Group's investment in one component of the Pointe Simon urban re-development project in Fort de France, Martinique and two properties in Jamaica, namely the Cambridge and the Camden.

During 2014, the Group sold the hotel component of the development to a Martinique incorporated company known as Compagnie Hoteliere de la Pointe Simon SAS (CHPS). As part of the sale negotiation, the Group acquired a 24% interest in CHPS for nominal consideration. The Group financed the sale to CHPS and at 31 December 2025 the outstanding balance, included in loans and other receivables, was €8.6 million (2024: €9.3 million). In 2024, the terms of the loan were modified to the following: €9.3 million repayable over 2 years, with a bullet at maturity (December 2026) based on the amount outstanding. The interest was based on EURIBOR 12 Months + 10% margin floored at 1.5% and capped at 3.5%. In 2025, the terms of the loan were further modified to revise the monthly instalment amounts and the amount of the final bullet repayment at maturity. Additionally, the interest rate was increased to EURIBOR 12 months + 18%. All other terms, including the maturity date and the interest rate ceiling and floor, remained unchanged.

13. Pension plan assets/liabilities

The following information explains the quantification of the assets and liabilities recognised in the consolidated statement of financial position and the net income for the year in accordance with the provisions of IAS 19.

	Pension plan asset		Pension plan liability		Net pension plan asset/(liability)	
	2025	2024	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Fair value of pension plan assets	521,715	511,159	465,570	461,836	987,285	972,995
Less: Present value of funded obligations	(435,683)	(430,322)	(494,548)	(491,330)	(930,231)	(921,652)

Less: Present value of unfunded obligations	(498)	(526)	–	–	(498)	(526)
	85,534	80,311	(28,978)	(29,494)	56,556	50,817

	2025	2024
	\$'000	\$'000
The amount in the consolidated statement of income is made up as follows:		
Net interest income	2,714	3,566
Current service cost	(22,731)	(22,238)
Administration expenses	(1,605)	(1,553)
Total pension cost (Note 32)	(21,622)	(20,225)

The remeasurement of pension plan obligation in other comprehensive income is made up as follows:

Actuarial gains and losses arising during the period from:

- changes in financial assumptions	13,753	13,621
- experience adjustment	(31,116)	(48,697)
	(17,363)	(35,076)

The movement in the fair value of pension plan assets of the year is as follows:

Balance at beginning of year	972,995	994,161
Administration expenses	(1,605)	(1,553)
Benefit payments	(60,623)	(51,983)
Company contributions	44,489	29,940
Contributions by plan participants	2,128	2,042
Settlements	–	2,900
Remeasurement arising from experience adjustment	(35,107)	(64,648)
Interest income	63,697	59,304
Exchange rate adjustments	1,311	2,832
Balance at end of year	987,285	972,995

	2025	2024
	\$'000	\$'000
The movement in the obligation to plan members over the year is as follows:		
Balance at beginning of year	922,178	918,600
Current service cost	22,731	22,238
Interest cost	60,983	55,738
Contributions by plan participants	2,128	2,042
Remeasurement arising from changes in financial assumptions	(13,753)	(13,621)
Remeasurement arising from experience adjustment	(3,991)	(15,951)
Settlements	–	2,900
Benefits paid	(60,622)	(51,984)
Exchange rate adjustments	1,075	2,216
Balance at end of year	930,729	922,178

The principal actuarial assumptions used for accounting purposes were:

	2025	2024
Discount rates	5.6% - 7.6%	5.6% - 7.4%
Future salary increases	0.0% - 5.5%	0.0% - 5.3%
Post-retirement mortality	GAM94/NIS2012	GAM94/NIS2012
Pre-retirement mortality	GAM94/NIS2012	GAM94/NIS2012
Withdrawal from service	Ignored/Yes	Ignored/Yes
Future pension increases	Ignored / 3.5%	Ignored / 3.5%
Proportion of employees opting for early retirement	Ignored	Ignored
Life expectancy of pensioners at the age of 65 - male	17.5 to 18.3 years	17.4 to 18.3 years
Life expectancy of pensioners at the age of 65 - female	21.8 to 23.2 years	21.8 to 23.2 years

The actual return on plan assets was a return of \$28,665,000 (2024: negative return of \$2,471,000).

	2025		2024	
	\$'000	%	\$'000	%
Pension plan assets are comprised as follows:				
Quoted investments				
Equity securities				
- Trinidad and Tobago	101,894	10.3%	125,240	12.9%
- Non-Caribbean	93,561	9.5%	64,940	6.7%
Government securities				
- Trinidad and Tobago	173,269	17.6%	167,764	17.1%
- Non-Caribbean	30,770	3.1%	30,876	3.2%
Corporate bonds				
- Trinidad and Tobago	52,535	5.3%	54,450	5.6%
- Non-Caribbean	178,137	18.0%	158,744	16.3%
Unquoted investments				
Government securities				
- Other Caribbean	32,086	3.2%	80,705	8.3%
Cash and cash equivalents	12,247	1.2%	14,935	1.5%
Property	41,500	4.2%	41,500	4.3%
Other	271,286	27.6%	233,841	24.1%
	987,285	100.0%	972,995	100.0%

The defined benefit plan assets as at 31 December 2025 include investments in the Group's managed mutual funds of \$8,754,000 (2024: \$4,395,000). Included in the plan's assets is a property with a fair value of \$41,500,000 (2024: \$41,500,000), which is not occupied by the Group.

Contributions from the defined contribution plan are invested in a deposit administration contract. The deposit administration contract is part of a general fund, which is managed by a Group subsidiary.

The Group's expected total contributions to its defined benefit pension plans for the year ending 31 December 2026 is \$36,349,000.

The duration of the defined benefit plans obligation at the end of the reporting period is 9.6 to 20.8 years (2024: 9.5 to 21.8 years).

Expressed in Trinidad and Tobago Dollars
(Continued)

13. Pension plan assets/liabilities (continued)

A quantitative sensitivity analysis for significant assumptions as at 31 December 2025 is shown below:

	Impact on the net defined benefit obligation	
	Increase \$'000	Decrease \$'000
1% increase/decrease in discount rate	(80,511)	97,725
1% increase/decrease in future salary increases	16,302	(14,406)
1% increase/decrease in future pension increases	41,496	(35,662)
Life expectancy increase/decrease by 1 year - male	7,281	(7,506)
Life expectancy increase/decrease by 1 year - female	12,641	(12,965)

The sensitivity analysis above has been determined based on a method that extrapolates the impact on the net defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

14. Deferred taxation

The following amounts are shown in the consolidated statement of financial position:

	2025 \$'000	2024 \$'000
Deferred tax assets:		
- To be recovered after more than 12 months	110,558	145,167
- To be recovered within 12 months	25,291	19,120
	<u>135,849</u>	<u>164,287</u>
Deferred tax liabilities:		
- Crystallizing after more than 12 months	(312,533)	(330,525)
- Crystallizing within 12 months	(19,407)	(14,929)
	<u>(331,940)</u>	<u>(345,454)</u>
Net deferred tax liability	<u>(196,091)</u>	<u>(181,167)</u>

Deferred income tax assets are recognised for tax losses carried forward to the extent that the realisation of the related tax benefit through future taxable profits is probable.

The movement on the net deferred tax account is as follows:

	2025 \$'000	2024 \$'000
Balance at beginning of year	(181,167)	(128,084)
Charged to:		
- statement of income	(7,010)	(45,769)
- other comprehensive income	(8,248)	(8,009)
Other movements	-	1,172
Exchange rate adjustments	334	(477)
Balance at end of year	<u>(196,091)</u>	<u>(181,167)</u>

	(128,084)	(45,769)	(8,009)	1,172	(477)	(181,167)

There are tax losses relating to subsidiaries that are available for set-off against future chargeable profits of \$468,212,000 (2024: \$646,106,000). These tax losses expire over varying periods. No deferred tax asset has been recognised on tax losses carried forward of \$431,724,000 (2024: \$596,142,000), due to the uncertain timing of their recovery. Some of these losses have not yet been agreed with the respective tax authorities.

Deferred tax assets have not been recognised within subsidiaries that have suffered tax losses either in the current or previous tax periods, as it is not probable that sufficient future taxable profits will be available against which those losses can be utilised. In the prior year, deferred tax assets of \$1,907,000 were recognised in respect of such tax losses.

Pillar Two

Pillar Two is a set of rules developed by the Organisation for Economic Co-operation and Development (OECD) which impose a top-up tax on large, multinational groups of companies such that the group's effective tax rate is at least 15% in every country in which it operates. The Group is impacted by Pillar Two to the extent that it operates in both low-tax jurisdictions and jurisdictions that have incorporated the Pillar Two rules into domestic tax law.

In December 2023, Bermuda passed corporation income tax legislation that is not considered Pillar Two legislation. This legislation, which introduced a tax rate of 15%, became effective 1 January 2025. Also in December 2023, the Netherlands introduced tax measures that qualify as Pillar Two legislation, with some aspects of the legislation effective since 1 January 2024, and others which became effective on 1 January 2025.

The Group has applied the mandatory exception as per IAS 12 and therefore has not recognised or disclosed information about deferred tax assets and liabilities relating to the Netherlands Pillar Two income taxes.

15. Insurance contracts (continued)

15.2 Insurance revenue and expenses (continued)

15.2.2 Amounts determined on transition to IFRS 17

For insurance contracts measured under the GMM and/or the VFA, an analysis of insurance revenue for insurance contracts issued and the CSM by transition method is included in the following tables. Insurance contracts measured under the PAA are not included in these tables because the Group applied the full retrospective approach to such contracts.

	2025			
	Traditional life and interest sensitive without guarantees \$'000	Annuities \$'000	Unit linked life and interest sensitive with guarantees \$'000	Total \$'000
Insurance contracts issued				
<i>Insurance revenue</i>				
- New contracts and contracts measured under the full retrospective approach at transition	296,114	140,301	191,125	627,540
- Contracts measured under the fair value approach at transition	236,642	623,410	280,746	1,140,798
	<u>532,756</u>	<u>763,711</u>	<u>471,871</u>	<u>1,768,338</u>
<i>CSM as at 31 December</i>				
- New contracts and contracts measured under the full retrospective approach at transition	644,586	499,532	528,668	1,672,786
- Contracts measured under the fair value approach at transition	558,777	1,416,043	362,977	2,337,797
	<u>1,203,363</u>	<u>1,915,575</u>	<u>891,645</u>	<u>4,010,583</u>
				Long-term business \$'000
Reinsurance contracts held				
<i>CSM as at 31 December</i>				
- New contracts and contracts measured under the full retrospective approach at transition				7,027
- Contracts measured under the fair value approach at transition				91,791
				<u>98,818</u>

15.2.2 Amounts determined on transition to IFRS 17 (continued)

	2024			
	Traditional life and interest sensitive without guarantees \$'000	Annuities \$'000	Unit linked life and interest sensitive with guarantees \$'000	Total \$'000
Insurance contracts issued				
<i>Insurance revenue</i>				
- New contracts and contracts measured under the full retrospective approach at transition	222,826	96,366	148,128	467,320
- Contracts measured under the fair value approach at transition	255,923	701,026	285,886	1,242,835
	<u>478,749</u>	<u>797,392</u>	<u>434,014</u>	<u>1,710,155</u>
<i>CSM as at 31 December</i>				
- New contracts and contracts measured under the full retrospective approach at transition	439,732	169,110	441,782	1,050,624
- Contracts measured under the fair value approach at transition	478,984	1,506,235	490,911	2,476,130
	<u>918,716</u>	<u>1,675,345</u>	<u>932,693</u>	<u>3,526,754</u>
				Long-term business \$'000
Reinsurance contracts held				
<i>CSM as at 31 December</i>				
- New contracts and contracts measured under the full retrospective approach at transition				3,960
- Contracts measured under the fair value approach at transition				68,994
				<u>72,954</u>

On transition to IFRS 17, insurance contracts where the OCI option is applied, the Group determined the cumulative insurance finance income and expenses recognised in OCI at 1 January 2022 using the fair value approach. The movement in the fair value reserve for the debt investments at FVOCI related to those groups of contracts was as follows:

	2025 \$'000	2024 \$'000
Balance at beginning of year	(207,269)	(218,974)
Net gains	86,054	10,809
Related income tax	(5,286)	896
Balance at end of year	<u>(126,501)</u>	<u>(207,269)</u>

(a) Adjustment to the CSM in 2025 within the annuities category primarily arose from:

- (i) The implementation of a new actuarial system in the Dutch Caribbean, with expanded functionality that allowed for certain reconsiderations of actuarial assumptions.
- (ii) A project-based reassessment of expected and actual cash flows in Trinidad and Tobago, that resulted in the adjustment of future expected profits on certain annuity portfolios.

(a) During 2025, the Group's reinsurance subsidiary entered into a commutation and release agreement with a cedant in respect of Property and Motor Quota Share Retrocession contracts that were originally entered into during 2004 to 2009. Under the terms of the commutation and release agreement, both parties are mutually released from all past, present, and future payment obligations arising from the retrocession agreement. The commutation was completed on 30 September 2025, at which date all liabilities and obligations under the agreement were fully settled.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

15. Insurance contracts (continued)

15.12 Claims development tables - short-term insurance contracts (non-life)

The development of insurance liabilities provides a measure of the Group's ability to estimate the ultimate value of claims. Claims development tables are disclosed on an accident year basis (where the reference is to the actual date of the event that caused the claim), with the exception of international property and casualty claims, which is disclosed by underwriting year account.

	Total \$'000
Insurance claims - gross	
- By accident year	1,657,266
- By underwriting year	<u>40,624</u>
Total liability	<u><u>1,697,890</u></u>
Insurance claims - net	
- By accident year	472,844
- By underwriting year	<u>40,705</u>
Total liability	<u><u>513,549</u></u>

The Group provides information on the gross and net claims development for the current reporting period and seven years prior to it. The Group considers that there is no significant uncertainty with regard to claims that were incurred more than eight years before the reporting period.

The top half of each table below illustrates how the Group's estimate of total claims outstanding for each accident year/underwriting year has changed at successive year-ends. The bottom half of the table reconciles the cumulative claims to the amount appearing on the consolidated statement of financial position as per summary below.

Net (decrease)/increase in cash used in cash flow	<u>(360,445)</u>	<u>1,199,392</u>

Cash at bank earns interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements of the Group, and earn interest at the respective short-term deposit rates.

Cash and cash equivalents include deposits pledged with regulatory authorities in countries in which the Group is authorised to conduct business, as security for its policyholders. These deposits are subject to regulatory restrictions and are therefore not available for general use by the Group. Cash and cash equivalents pledged as at 31 December 2025 was \$34,358,000 (2024: \$31,512,000).

No cash and cash equivalents are pledged as collateral for financial liabilities.

17. Disposal group held for sale

During 2024, the Group, through its subsidiary Fatum Holding N.V., commenced a closed process to sell Thoma Exploitatie B.V. and its subsidiary companies (collectively, the Thoma Group), which forms a part of the Group's Insurance Brokerage Business segment. On 19 November 2024, the Group signed a Share Purchase Agreement that divests 100% of the shares of the Thoma Group. In accordance with the requirements of IFRS 5, the Group classified the Thoma Group as "Held for Sale".

On 24th January 2025, the Group successfully closed the sale of the Thoma Group. The Group recognised a gain on sale of \$651 million in the consolidated statement of income, within Profit from discontinued operations after taxation.

The net results of the Thoma Group have been consolidated into one line in the consolidated statement of income as Profit from discontinued operations after taxation. The results are presented below:

	2025 \$'000	2024 \$'000
Sales proceeds	888,007	–
Net assets disposed of	(212,242)	–
Cumulative translation and other reserves realised on disposal of discontinued operations	(25,215)	–

(a) During the year, the Group reassessed the functional currency of its subsidiaries in accordance with IAS 21 The Effects of Changes in Foreign Exchange Rates. Based on this reassessment, the Group concluded that the functional currencies of the following subsidiaries should be changed to currencies that more faithfully reflect the economic effects of the entities' underlying transactions, events, and conditions: Guardian Resorts Jamaica Limited, Guardian Resorts International Inc, Guardian International Inc, Guardian Group St Lucia Holdings Limited. As a consequence of this change, an amount of \$344,053,000 was transferred from the translation reserve to retained earnings.

20. Non-controlling interest in subsidiary

	2025 \$'000	2024 \$'000
Non-controlling interest in subsidiary	19,273	13,238

At the end of the year, the non-controlling interest balance represents a 32.3% shareholding in Vanguard Risk Solutions Limited.

21. Financial liabilities

	2025 \$'000	2024 \$'000
Non-current portion of financial liabilities		
Medium-term borrowings	2,931,460	3,347,979
Repurchase agreements	26,405	14,750
Total non-current portion of borrowings and repurchase agreements (Note 21.1)	2,957,865	3,362,729
Current portion of financial liabilities		
Medium-term borrowings	274,999	67,263
Repurchase agreements	170,043	221,106
Total current portion of borrowings and repurchase agreements (Note 21.1)	445,042	288,369
Interest payable	24,853	10,152
	469,895	298,521
Total	3,427,760	3,661,250

The fair value of medium-term borrowings amounted to \$3,314,111,000 (2024: \$3,506,828,000). The fair value of medium-term borrowings is determined by applying a discounted cash flow model for the remaining term to maturity using a current yield curve for a similar debt instrument. For short-term debt, the carrying amounts approximate their fair value.

The repurchase agreements represent the normal activities of the asset management operations. The carrying amount of the repurchase agreements approximate their fair value.

The Group has not made any defaults of principal, interest or other breaches with respect to their borrowings during the year (2024 - Nil).

Other movements	9,732	–
Exchange rate adjustments	(7,356)	360
Balance at end of year	<u>3,402,907</u>	<u>3,651,098</u>

Details of major borrowings outstanding as at 31 December 2025 are as follows:

Company**Facility 1 - \$880 million**

This is a secured fixed rate 6-year bond ending in December 2027. Interest is charged at 5% per annum and is paid semi-annually. The principal is payable at maturity.

Facility 2 - \$680.5 million

This is a secured fixed rate 6-year loan ending in December 2028. The loan was drawn in tranches with \$583,675,906 drawn in December 2022 and the remaining \$96,824,094 drawn in January 2023. Interest is charged at 4.83% per annum and is paid semi-annually. Principal and interest was repaid via first payment on 21 June 2023 of TT\$47,027,285, then 10 semi-annual payments of \$47,500,000 commencing December 2023, with a balloon payment of \$301,481,685 paid at maturity.

Facility 3 - \$400.163 million

This is a secured fixed rate 5-year loan ending in June 2029. The loan was drawn in two Tranches, Tranche A of \$382,000,000 and Tranche B of \$18,163,000. Tranche A interest is charged at 5.35% and Tranche B interest is charged at 5.20% per annum and is paid semi-annually. The principal is payable at maturity.

Facility 4 - \$1.05 billion

This is a secured fixed rate multi-tranche bond comprising of three tranches. Interest is payable semi-annually, and principal is payable at maturity. Tranche A of \$479,061,000 ending in 2028, bears interest of 5.19% per annum. Drawdowns under Tranche A consisted of \$449,061,000 drawn in 2025, \$25,760,000 drawn in January 2026 and \$4,240,000 drawn in February 2026. Tranche B of \$367,564,000 ending in 2031, bears interest of 6.49% per annum. Tranche C of \$203,375,000 ending in 2035, bears interest of 7.04% per annum.

Facility 5 - J\$13.4 billion

This is an unsecured fixed rate bond comprising of five series where interest is payable quarterly and principal is payable at maturity. Series A interest is charged at 5.75% and was repaid in September 2022, Series B interest is charged at 6.50% and was repaid in September 2025, Series C interest is charged at 6.75% ending in September 2026, Series D interest is charged at 7.0% ending in September 2027 and Series E interest is charged at 8.75% ending in September 2030.

Facilities 1, 2, 3 and 4 are secured by a debenture creating a charge over the fixed and floating assets of Guardian Holdings Limited.

(Continued)

21. Financial liabilities (continued)**21.1 Borrowings and repurchase agreements (continued)****Subsidiary****Loan 1 - US\$40 million**

This is an unsecured fixed rate 5-year loan ending in June 2026. Interest is charged at 3.75% and is payable semi-annually. The principal is payable at maturity. Several of the Group's subsidiaries are guarantors on this loan.

22. Investment contract liabilities

	2025 \$'000	2024 \$'000
The movements in the liabilities arising from investment contracts are summarised below:		
Balance at beginning of year	2,107,775	2,023,612
Contributions received	174,535	200,716
Benefits paid	(324,906)	(183,940)
Investment return from underlying assets	64,868	71,412
Asset management fees charged	(4,170)	(4,673)
Other movements	1,426	(470)
Exchange rate adjustments	(16,389)	1,118
Balance at end of year	<u>2,003,139</u>	<u>2,107,775</u>

Investment contract liabilities carry floating rates of interest and therefore the carrying amounts approximate their fair values.

23. Third party interests in mutual funds

Balance at beginning of year	1,579,685	1,686,258
Share of net income	15,292	24,190
Unrealised gains/(losses)	10,973	(35,044)
Net change in mutual fund holder balances	91,007	(69,620)
Distributions	(28,681)	(26,099)
Other movements	(21,794)	–
Balance at end of year	<u>1,646,482</u>	<u>1,579,685</u>

24. Post-retirement medical benefit obligations

The amounts recognised in the consolidated statement of financial position are as follows:

Present value of obligations	<u>129,828</u>	<u>124,582</u>
The amount in the consolidated statement of income is made up as follows:		
Interest cost	7,846	7,271
Current service cost	3,869	2,541
Cost for the year (Note 32)	<u>11,715</u>	<u>9,812</u>

Expressed in Trinidad and Tobago Dollars

(Continued)

24. Post-retirement medical benefit obligations (continued)

	2025	2024
	\$'000	\$'000
The movement in the liability is as follows:		
Balance at beginning of year	124,582	122,876
Remeasurement of obligation (actuarial gains)	(595)	(2,607)
Employer contributions	(6,110)	(5,828)
Expense as per above	11,715	9,812
Exchange rate adjustments	236	329
	<u>129,828</u>	<u>124,582</u>

	2025	2024
The principal actuarial assumptions used were as follows:		
Discount rate	5.6% - 10.0%	5.6% - 8.5%
Healthcare cost escalation	3.9% - 7.0%	3.9% - 8.5%
Retiree premium escalation:		
Existing retirees	0.0% - 8.0%	0.0% - 10.0%
Future retirees	0.0% - 8.0%	0.0% - 10.0%
Pre-retirement mortality	NISTT2012	NISTT2012
Post-retirement mortality	GAM94	GAM94

A quantitative sensitivity analysis for significant assumptions is shown below:

	Impact on the obligation			
	2025		2024	
	Increase	Decrease	Increase	Decrease
	\$'000	\$'000	\$'000	\$'000
1% increase/decrease in discount rate	(15,415)	19,190	(15,021)	18,776
1% increase/decrease in medical cost trend rate	19,276	(15,737)	18,849	(15,327)

Total expected contributions to post-employment benefit plans for the year ending 31 December 2026 is \$6,642,000.

The duration of the post-retirement medical benefit obligation plans at the end of the reporting period is 12 to 28 years (2024: 12 to 15 years).

25. Other liabilities

	2025	2024
	\$'000	\$'000
Fronting contracts and insurance brokerage related payables	524,647	262,724
Accrued expenses	318,262	270,443
Deposits and premiums received in advance	7,209	6,280
Accounts payable	421,082	424,437
	<u>1,271,200</u>	<u>963,884</u>
Current	1,264,389	950,411
Non-current	6,811	13,473
	<u>1,271,200</u>	<u>963,884</u>

The carrying amounts of other liabilities approximate their fair value.

Tax on dividend	17,000	9,000
Tax losses not recognised	55,426	66,063
Other	(1,300)	30,188
Tax charge for the year	<u>211,832</u>	<u>250,995</u>

Pillar Two

The Group has a subsidiary in Bermuda where corporation income tax legislation was enacted that does not fall within the definition of Pillar Two legislation. The Group also has a subsidiary in the Netherlands where Pillar Two legislation was enacted. There is no expectation that the Pillar Two legislation enacted in the Netherlands will result in additional taxes that are material for the Group in the foreseeable future.

35. Earnings per share

Basic earnings per share amounts are calculated by dividing the net profit for the year attributable to ordinary shareholders of the company by the weighted average number of ordinary shares outstanding at the consolidated statement of financial position date.

	2025 \$'000	2024 \$'000
Net profit attributable to ordinary shareholders	1,532,992	850,146
Net profit attributable to ordinary shareholders from continuing operations	882,442	841,766
Net profit attributable to ordinary shareholders from discontinued operations	650,550	8,380
	Number of shares ('000)	
Weighted average number of ordinary shares in issue (thousands)	232,003	232,022
	\$	\$
Basic and diluted earnings per ordinary share	6.61	3.66
Basic and diluted earnings per ordinary share from continuing operations	3.80	3.63
Basic and diluted earnings per ordinary share from discontinued operations	2.81	0.03

36. Dividends

	2025 \$'000	2024 \$'000
Final dividend for 2024 - 57¢ per share (2023 - 53¢ per share)	132,246	122,971
Interim dividend for 2025 - 66¢ per share (2024 - 23¢ per share)	153,122	53,366
	285,368	176,337

On 26 February 2026, the Board of Directors declared a final dividend of 25 cents per share (2024 - 57 cents), a total dividend to be paid of \$58 million (2024: \$132 million). These consolidated financial statements do not reflect the final dividend which will be accounted for as an appropriation of retained earnings in the year ending 31 December 2026.

37. Adjustment for non-cash items in operating profit

	2025 \$'000	2024 \$'000
Share of profit from associated companies (Note 9)	(40,534)	(30,872)
Net fair value losses/(gains) on financial assets (Note 28)	243,796	(337,001)
Third party share of net income of mutual funds (Note 23)	15,292	24,190
Net realised gains on financial assets	(240,680)	(44,017)
Impairment losses on financial assets	67,022	46,902
Net loss for the year on post-employment benefits	33,337	30,037
Depreciation and amortisation	86,355	91,231
Loss/(gain) on disposal of property, plant & equipment	943	(17,935)
Gain on sale of discontinued operations	(650,550)	-
Change in fair value of investment properties, other than Pointe Simon (Note 7)	(17,072)	(30,882)
Change in fair value adjustment on Pointe Simon (Note 7)	-	(1,890)
Impairment of intangible assets (Note 8)	25,841	-
Gain on disposal of properties	(8,394)	(7,685)
Foreign exchange gains	(22,827)	(33,815)
Other non-cash income	6,855	368
	(500,616)	(311,369)

Total gains or losses (realised and unrealised) for the year in the above table are presented in the consolidated statement of income and other comprehensive income as follows:

	2025 \$'000	2024 \$'000
Total gains or losses recognised in consolidated statement of income		
Insurance service expenses	(3,992)	(5,737)
Net realised losses	(2,306)	(781)
Net fair value (losses)/gains	(10,647)	65,073
Other operating expenses	(3,254)	(4,066)
	(20,199)	54,489
Total gains or losses recognised in consolidated statement of comprehensive income		
Net fair value losses on debt securities at fair value through other comprehensive income	(10,777)	(2,728)
Gains on property revaluation	76,630	7,205
	65,853	4,477

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars
(Continued)

38. Fair value measurement (continued)

Total unrealised gains/(losses) for the period included in consolidated statement of income for assets and liabilities held at end of year:

	2025 \$'000	2024 \$'000
Assets measured at fair value:		
Investment properties	17,072	33,845
Investment securities:		
Equity securities	(27,669)	31,075
Other	(50)	152
	<u>(10,647)</u>	<u>65,072</u>

Description of significant unobservable inputs

The significant unobservable inputs used in the fair value measurements categorised within Level 3 of the fair value hierarchy, together with a quantitative sensitivity analysis as at 31 December 2025 and 2024 are shown below:

	Valuation Technique	Significant unobservable inputs	Range	Sensitivity of the input to fair value
Freehold and investment properties	DCF method - Income and sales comparison approach (by professional external valuers)	Discount rates	2025: 6.0% to 9.0% 2024: 6.0% to 9.0%	1% increase (decrease) in discount or capitalization rates would result in a decrease (increase) in fair value by \$68,751,000 (\$88,631,000) (2024: \$82,110,000 (95,814,000))
	DCF method - Direct capitalisation of income approach; Profit tests or accounts approach (by professional external valuers)	Capitalisation rates	2025: 8.50% to 10.25% 2024: 8.50% to 10.50%	
	Sale comparison approach (by professional external valuers)	Comparable sales	N/A	Fair value can increase by \$11,797,000 or decrease by \$14,752,000 (2024: increase by \$12,470,000 or decrease by \$16,522,000)
Unquoted equity securities	N/A - held at cost	Fair value of consideration at acquisition	N/A	5% increase (decrease) in the book or indicative price per share would result in a increase (decrease) in fair value by \$22,007,000 (2024: \$20,278,000)
	Valuation ratios	Book price per share	Various ranges	
		Indicative price per share	Various ranges	
Series G Government of Barbados debt securities	DCF method	Risk adjusted yield curve (issued by the Central Bank of Barbados)	2025: 7.50% 2024: 6.99%	1% increase (decrease) in the yield would result in a decrease (increase) in fair value by \$13,977,000 and \$16,860,000 respectively (2024: \$15,377,000 and \$18,732,000)

As can be seen from the above table, a possible change in the key unobservable inputs can result in a significantly higher or lower fair value measurement. There are no significant interrelationships between these key inputs and other unobservable inputs which could magnify or mitigate the effects of those changes.

39. Segment information (continued)

	Total revenue from external customers		Non current assets	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
Trinidad and Tobago	2,256,386	2,521,973	1,089,979	1,115,663
Jamaica	2,185,592	2,257,174	1,334,326	1,163,074
Barbados	285,192	204,084	43,049	44,313
Dutch Caribbean	1,470,563	1,501,979	333,277	301,771
Other countries	1,830,141	1,566,663	832,838	702,465
	<u>8,027,874</u>	<u>8,051,873</u>	<u>3,633,469</u>	<u>3,327,286</u>

The total revenue information above consists of insurance revenue, investment income, net realised gains/losses, net fair value gains/losses, fee income, commission income from brokerage activities and other income, from continuing operations. Revenue is based on locations of the customer and there are no transactions with a single customer that amount to more than 10% of total revenue.

Non-current assets for this purpose consist of property, plant and equipment, right-of-use assets, investment properties, intangible assets, investment in associated companies and properties for development and sale.

40. Contingent liabilities**Legal proceedings**

Group companies are defendants and plaintiffs in various legal actions. In the opinion of the Directors, after taking legal advice, the outcome of such actions will not give rise to any material loss.

41. Commitments**Capital commitments**

As at the year end, a development contract and agreement have been entered into in respect of a property project. The commitments not recognised in these consolidated financial statements are as follows:

	2025	2024
	\$'000	\$'000
Property development	452	2,001
Property renovations	1,990	8,380
Intangible asset - insurance system upgrade	26,685	5,962
	<u>29,127</u>	<u>16,343</u>
Credit commitments		
Loan commitments not yet disbursed by the Group	<u>101,610</u>	<u>187,857</u>

42. Related party disclosures (continued)

	2025	2024
	\$'000	\$'000
<i>Loans to key associates:</i>		
Balance at beginning of year	65,723	71,234
Loan repayments received	(6,374)	(1,268)
Interest charged	2,242	2,536
Interest received	(2,234)	(2,544)
Exchange rate adjustments	14,516	(4,235)
Balance at end of year	<u>73,873</u>	<u>65,723</u>

There was no provision for doubtful debts at the reporting date and no bad debt expense in the year (2024: Nil).

Other related parties primarily include transactions with NCBFG subsidiaries and its parent companies.

Financial assets of key associates comprise multiple corporate bonds plus interest receivable and preference shares issued by RGM to the Group. The preference shares held by the Group are cumulative, non-convertible and redeemable. The corporate bonds carry fixed interest rates and principal and interest are payable semi-annually. All bonds are secured by mortgages on various properties.

Financial assets of other related parties comprise debt, equity and other investments issued by entities controlled by related parties, in the ordinary course of business.

Borrowings from related parties consist of an affiliated company's participation in Series A, B, C and D of the Group's J\$13.4 billion bond. Details of the bond are disclosed in Note 21.

Loans to key management and other related parties of the Group are secured and settlement occurs in cash. The details of the loan advanced to CHPS are disclosed in Note 12.

43. Assets under management

Assets under management, which are not beneficially owned by the Group, but which the Group manages on behalf of investors are listed below:

	Carrying Amount	
	2025	2024
	\$'000	\$'000
Amounts not included in the consolidated statement of financial position		
Cash and short-term investments	1,599,353	686,408
Investments	12,030,237	5,764,945
Interest and other receivables	150,701	13,040
	<u>13,780,291</u>	<u>6,464,393</u>

In September 2025, the Group acquired the pension fund management portfolio of NCB Insurance Agency & Fund Management Limited. The acquisition expanded the Group's managed portfolio and resulted in an increase in assets under management in the current financial year.

44. Pledged assets

The Group has deposited certain assets with the regulatory authorities in the countries in which it is authorised to conduct business as security for its policyholders. The type and values of these assets are in accordance with the legal requirements of the countries concerned. The carrying value of pledged assets is:

	2025	2024
	\$'000	\$'000
Statutory deposits/funds	<u>591,670</u>	<u>528,745</u>

GUARDIAN HOLDINGS LIMITED

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2025

Expressed in Trinidad and Tobago Dollars

(Continued)

45. Subsequent events

Change in financial year-end

On 26 February 2026, the Board of Directors approved a change in the financial year-end of the Group from 31 December to 30 September, effective 1 January 2026. The change was made to align the Group's reporting period with that of its parent company.

As a result of this change, the next consolidated year-end financial statements will be prepared for a nine-month period from 1 January 2026 to 30 September 2026. Comparative information presented will cover the twelve-month period from 1 January 2025 to 31 December 2025 and therefore will not be directly comparable with the current period.

The change in financial year-end does not result in any changes to the Group's accounting policies, nor does it have an impact on the Group's critical accounting estimates and judgements.

SUPPLEMENTAL INFORMATION
FINANCIALS EXPRESSED IN US DOLLARS
31 DECEMBER 2025

The Group's Consolidated Statement of Financial Position, Consolidated Statement of Income and Consolidated Statement of Comprehensive Income expressed in US dollars appears below. The purpose of this publication is to provide readers of the Group's Annual Report, a number of whom are from jurisdictions outside of Trinidad and Tobago, with a quick and convenient overview of the Group's financial performance, referenced against a major international currency. The exchange rate used for this purpose is TT\$6.77045 to US\$1.00.
